Communicating With Contractual Compliance

Tips for communicating with ICANN Contractual Compliance

- ⦿ Whitelist emails from icann.org
- ⦿ Check that your mail servers are not blocking emails from ICANN
- ⦿ **Reply to compliance** notices ASAP and state what you are doing
 - ⦿ But no later than notice deadline
 - ⦿ Early response allows for follow up and collaboration if insufficient
- ⦿ Do not change the subject lines in any way when responding to compliance notices
- ⦿ Make sure response + attachments are less than 4 MB size total

New Registry Audit – Preliminary Results

Issue	Importance
Variations or missing data in Data Escrow file vs. DNS vs. BRDA vs. zone file	Correct processing and maintenance of registration data is required for restorability and to protect consumers
Monthly reports: number of domains incorrectly reported	Inaccurate domain counts may result in incorrect reporting to public and over or underpayment of fees
Abuse contact data: missing or incorrect	Abuse contact data serves the community's needs to report abuse
Orphan Glue Records: orphan glue records found in zone file	Orphan glue records are prone to be used for malicious purposes.
Registry-Registrar Agreements: required abuse provision missing	Contract language regarding abuse informs the community and promotes security

New Registry Audit – Preliminary Results

Issue	Importance
Business Continuity Plan does not exist or is not tested	To ensure that Registry operations will continue in case of failure of the main Registry system.
Instances of trademarked domains (covered labels) not included in LORDN file	Trademark owners are not informed about their trademark being registered
Registry stated that it will use only TMCH certified Registrars; but some weren't certified	To ensure non-preferential treatment of Registrars
Security threats: technical analysis not performed	Technical analysis and threat handling procedures essential to identifying and addressing threats efficiently

Registry Agreement Lessons Learned Guidelines

1. Abuse Contact Data

Required Elements to be Published & Guidance under Specification 6

- ⦿ Email address, mailing address and primary contact (may be role-based)
- ⦿ On TLD's webpage referencing abuse reports: ensure valid email address, postal address and primary contact

2. Zone File Access Requirements (CZDS)

Replying to Requests & Reasons for Denial under Specification 4

- ⦿ Agreement is not explicit on when TLD must reply to requests for zone file access
 - ⦿ Be reasonable, open and transparent
 - ⦿ Establish, publish and adhere to policy that informs end-users by when they should reasonably expect a response
 - ⦿ ICANN inquiry forwards user complaints about pending requests
- ⦿ Three reasons for denying access under Specification 4:

- ⦿ ICANN will generally send a follow up for:
 - ⦿ Insufficient response received before due date and time remains
 - ⦿ Insufficient response received early and ICANN review/response past due date
 - ⦿ Extension requested by contracted party by due date (with reason)
 - ⦿ Clarification requested by contracted party before due date
- ⦿ ICANN will advance to next phase for:
 - ⦿ No response from contracted party
 - ⦿ Insufficient response received near or on due date

Informal Resolution Process – Contacts

ICANN staff uses various contacts in the informal resolution process

- ◉ Registrars: 1-2-3 notices sent to designated email contacts depending on complaint type; primary contact is also copied on 3rd notice and sent 3rd notice fax
- ◉ Registries: 1-2-3 notices and 3rd notice fax sent to compliance contact; primary contact and legal notice contact also copied on 3rd notice
- ◉ Reminder calls are made to contracted parties after 2nd and 3rd notices (if response is insufficient)
 - ◉ Primary contact for registrars and compliance contact for registries
 - ◉ Telephone numbers are encouraged to be direct lines (rather than general customer service lines), with voicemail
