Requests relating to other IETF-created registries for which the request rate is more than five per month (l)	8
Deliverables	10
Provide publicly accessible, clear and accurate periodic statistics	10
Track and publicly report on a monthly basis (monthly report)	10
Conclusions.....	11

Executive Summary

This monthly report provides statistical information of the IANA Services operations as they relate to the IETF. Also included are the deliverables for this reporting period in accordance with the Supplemental Agreement (SLA) between ICANN and the IAOC with the effective date 28 March 2017. The draft 2018 SLA is currently being reviewed.

For this reporting period, we completed 137 of 137 requests within the IANA Services processing goal times (100%).

Statistics

As outlined in the IETF–IANA SLA, ICANN is tasked with collecting and reporting on IETF-related statistics. ICANN has sub-contracted with its affiliate Public Technical Identifiers (PTI) to perform the IANA Services on its behalf and consistent with the SLA.

Below you will find the list of statistics as requested by the SLA, a description of what queue’s statistics are being provided to fulfill that deliverable and an analysis of the data for each queue. The actual charts representing the data can be found at <http://www.iana.org/reporting-and-stats/index.html>.

This month’s statistics were generated through running scripts against a ticketing system log database. The charts were generated using java program using Jfreechart library.

The following types of charts have been defined for each queue for the reporting year 2018:

- Month to month comparison histogram of requests created/closed/open
- Month to month comparison histogram of age groups of closed tickets
- This month’s absolute age of closed requests
- Month to month comparison histogram of age groups of open tickets
- This month’s absolute age and current state of open requests
- Month to month comparison of mean, median and standard deviation for processing times of closed tickets
- Histogram for cumulative IETF requests for created/closed/resolved at the end of the reporting period and the year to date

IESG approved documents (a)

Requests in the “drafts-approval” queue begin at the time the IANA Services Operator receives a notification of an approval or intent to publish a document and end when the RFC-Editor has acknowledged receipt of the notification of completed actions by the IANA Services Operator.

QUEUE: DRAFTS-APPROVAL	
Total closed tickets	24
Tickets with no IANA Registry Actions	4
IANA Services processing time goals met (14 days or less)	24/24 (100%)
Highest total processing days	43
Highest total IANA Processing days	8
Total open tickets	10

Highest total processing days to date	148
Highest total IANA Processing days to date	14

Tickets that required more IANA Processing time than the SLA prescribes (14 IANA Processing days or less) or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
OPEN	148	14	Extra time required for delegating home.arpa. Progress is being made.
OPEN	94	1	Waiting for TLS document.

Reference Updates (b)

The requests in the “drafts-update-refs” queue begin at the time the RFC-Editor notifies IANA Services Operator of the RFC number assigned to a document that includes actions in the IANA Considerations section and ends when all references to the document are updated in the Protocol Parameter registries.

QUEUE: DRAFTS-UPDATE-REFS	
Total closed tickets	12
IANA Services processing goals met (7 days or less)	12/12 (100%)
Highest total processing days	4
Highest total IANA Processing days	4
Total open tickets	5
Highest total processing days to date	49
Highest total IANA Processing days to date	5

Tickets that required more IANA Processing time than the SLA prescribes (7 IANA Processing days or less) or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

Last Calls (c)

Requests begin at the time the IANA Services Operator receives a notification of Last Call from the IESG and ends with the IANA Services Operator submitting official comments to the IESG. Each request in the statistics represents a separate/individual Last Call, even if the Last Call is being repeated.

QUEUE: DRAFTS-LASTCALL	
Total closed tickets	28
IANA Services processing goals met (see breakdown)	28/28 (100%)
Total open tickets	6

Last Call Time Frame	Total Requests	Completed within time goals
13 days	1	1
2 weeks	17	17
20 days	2	2
3 weeks	4	4
22 days	2	2
4 weeks	2	2

**NOTE: Three tickets appeared to exceed their due date by one day, but all were submitted on the last day of Last Call.

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

Evaluations (d)

Requests begin at the time the IANA Services Operator receives a notification of Evaluation from the IESG and ends with the IANA Services Operator submitting official comments to the IESG. Each request in the statistics represents a separate/individual Evaluation, even if the Evaluation is being repeated.

QUEUE: DRAFTS-EVALUATION	
Total closed tickets	34
IANA Services processing goals met (before	34/34

the telechat)	(100%)
Total open tickets	5

** For requests triggered by Conflict Reviews, the IANA Services Operator understands the due date to be the day before the telechat during which the document is to be discussed, provided the telechat will take place at least one week from the day the request is received.

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

Media (MIME) type requests (e, f)

The IANA Services Operator receives requests for registration of new Media types. Also received, but rarely, are modification and deletion requests for Media types. All of these are processed in the “iana-mime” queue. These requests begin with the receipt of an application for (or modification/deletion of a Media type and end with the request being resolved with a successful registration, removal or modification. In some cases, the requests are closed due to withdrawal of the request by the requester or via administrative closure, typically due to lack of response from the requester. We understand that MIME Media types are currently referred to as “Media Types.” The queue “iana-mime,” however, was named prior to this change.

QUEUE: IANA-MIME	
Total closed tickets	3
IANA Services processing goals met (14 days or less)	3/3 (100%)
Highest total processing days	35
Highest total IANA Processing days	2
Average Expert days	18
Total open tickets	11
Highest total processing days to date	470
Highest total IANA Processing days to date	12

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
OPEN	470	1	Delay on expert's part.
OPEN	118	1	Delay on expert's part.
OPEN	62	1	Delay on expert's part.

New Port number requests (g)

The IANA Services Operator receives requests for assignment of new user port numbers. These requests are processed in the "iana-ports" queue. Port requests begin with the receipt of an application for a user port number and end with the request being resolved with a successful registration, withdrawn by the requester, or administratively closed.

QUEUE: IANA-PORTS	
Total closed tickets	8
IANA Services processing goals met (14 days or less)	8/8 (100%)
Highest total processing days	74
Highest total IANA Processing days	6
Average total days	34
Average Expert days	16
Total open tickets	8
Highest total processing days to date	75
Highest total IANA Processing days to date	2

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
OPEN	75	2	Delay on the part of both expert and requester.
CLOSED	74	3	Delay on requester's part.
CLOSED	67	3	Delay on requester's part.
CLOSED	63	3	Delay on expert's part.

Modification to and/or deletions of Port number requests (h)

The IANA Services Operator receives requests for modification of existing port numbers. Also received, but are rare, are deletion requests. Both of these are processed in the “port-modifications” queue. These requests begin with the receipt of a modification (or deletion) request and end with the request being resolved with a successful modification (or removal) or closed due to withdrawal or administrative closure.

QUEUE: PORT-MODIFICATION	
Total closed tickets	3
IANA Services processing goals met (14 days or less)	3/3 (100%)
Highest total processing days	4
Highest total IANA Processing days	2
Total open tickets	1
Highest total processing days to date	8
Highest total IANA Processing days to date	1

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

New Private Enterprise Number (PEN) requests (i)

All PEN (Private Enterprise Numbers) type requests are processed in an automated program that does not go through the IANA Services Operator’s ticketing system. The tool includes new, modification and deletion requests. The tool does not yet produce statistics similar to what is available for the other protocol parameter queues.

QUEUE: PEN	
Total PENs assigned	151

Modifications to and/or deletions of PEN requests (j)

QUEUE: PEN-MODIFICATION	
Total PENs modified	31
Total PENs deleted	0

New TRIP ITAD Numbers (k)

The IANA Services Operator receives requests for assignment of new TRIP ITAD numbers. These requests are processed in the “iana-trip” queue. Requests begin with the receipt of an application for a TRIP ITAD number and end with the request being resolved with a successful registration, withdrawn by the requester, or administratively closed.

QUEUE: IANA-TRIP	
Total closed tickets	1
IANA Services processing goals met (7 days or less)	1/1 (100%)
Highest total processing days	4
Highest total IANA Processing days	1
Total open tickets	0
Highest total processing days to date	n/a
Highest total IANA Processing days to date	n/a

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

Requests relating to other IETF-created registries for which the request rate is more than five per month (l)

For those registries where there are more than 5 requests per month, the IANA Services Operator creates a separate queue for tracking those tickets.

QUEUE: MULTICAST	
Total closed tickets	5
IANA Services processing goals met (14 days or less)	5/5 (100%)
Highest total processing days	25
Highest total IANA Processing days	2
Average Expert days	13
Total open tickets	1
Highest total processing days to date	53
Highest total IANA Processing days to date	2

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
n/a	n/a	n/a	n/a

Note: The IANA-PROT-PARAM queue is for miscellaneous requests that are not processed in a separate queue due to the lack of volume for any one type of request. These requests can require the first-come first-served policy, expert review, IESG approval or another review method. In the SLA, processing goals are determined by the type of request. However, for this queue there is no separation of request type.

QUEUE: IANA-PROT-PARAM	
Total closed tickets	19
IANA Services processing time goals met (see breakdown below)	19/19 (100%)
Highest total processing days	49
Highest total IANA Processing days	4
FCFS Completed within goal time (7 IANA Processing days or less)	11/11
Expert Review/Specification Required within goal time (14 IANA Processing days or less)	7/7
Early Allocation completed within goal time (14 IANA Processing days or less)	1/1
IESG Approval completed within goal time (14 IANA Processing days or less)	n/a
Admin closed/Withdrawn	0
Total open tickets	13
Highest total processing days to date	565
Highest total IANA Processing days to date	3

Tickets that required more IANA Processing time than the SLA prescribes or that required more than 60 days of total processing time are described below.

TICKET DETAIL			
Status	Total Days	IANA Processing Days	Description
OPEN	565	3	Delay on expert's part. Waiting for TLS document. Currently looking for options of

			having the expert do the review until the new procedures are approved.
OPEN	331	2	Waiting for TLS document. Currently looking for options of having the expert do the review until the new procedures are approved.
OPEN	168	1	Delay on expert's part.
OPEN	168	1	Delay on expert's part.
OPEN	118	1	Delay on expert's part.
OPEN	73	2	Delay on the part of both expert and requester.

Deliverables

In accordance with the SLA, the IANA Services Operator is reporting on the following deliverables due within one (1) month of implementation of the agreement for the reporting year 2018:

- 1) Provide publicly accessible, clear and accurate periodic statistics (continual)
- 2) Track and publicly report on a monthly basis (monthly report - continual)
- 3) Single points of failure documentation to the IESG (continual)

Provide publicly accessible, clear and accurate periodic statistics

See "Statistics" section of this report and also <http://www.iana.org/reporting-and-stats/index.html>.

Track and publicly report on a monthly basis (monthly report)

The SLA describes three items that the IANA Services Operator will provide monthly reports for. These items are outlined below along with a description of actions taken for each.

- a. Resource allocation statistics as described in SLA item 2 of the Reports section

In item 2 in the Reports section of the SLA, there is a detailed list of statistics to be produced for the monthly report. The agreed upon partial statistics are found in the "Statistics" section of this report.

- b. The utilization of all identified finite resources defined within Protocol Parameter registries

The IANA Services Operator is undertaking a project to review all registries to identify those that are finite and additionally those that are in danger of being exhausted. As of the end of this reporting period, no registries have been identified as being in danger of exhaustion. The IANA Services Operator will continue to report findings as needed.

- c. Efforts that have addressed single points of failure/expertise (see item 3 in Services section of the SLA)

Conclusions

In January 2018, the IANA Services Operator cumulatively met 100% of the goal processing times over all requests.
