Strength
Commitment
Opportunity

The illustration shows a large green tree with a glowing top, set against a colorful, cloudy sky. Two small figures are standing at the base of the tree on a green hill, one appearing to be watering the tree. The text "Strength", "Commitment", and "Opportunity" is written in white on a black background to the right of the illustration.

ANNOUNCING
TODAY

SCO Mobile Server

- Highly scalable Hosting and Provisioning platform for web-based client-server applications with smart phone and PC clients
- A platform for cloud computing leading the way to Web 3.0.

SCO Mobile Development Kit

- Streamlines building web applications
- Libraries for server-side applications
- Libraries for both J2ME and .Net clients
- Common services for web applications
- No-charge download

At the Seoul Digital Forum in May 2007, Eric Schmidt, CEO of Google, was asked to define Web 2.0 and Web 3.0. He responded:

“If I were to guess what Web 3.0 is, I would tell you that it's a different way of building applications... My prediction would be that Web 3.0 will ultimately be seen as applications which are pieced together. There are a number of characteristics: the applications are relatively small, the data is in the cloud, the applications can run on any device, PC or mobile phone, the applications are very fast and they're very customizable. Furthermore, the applications are distributed virally: literally by social networks, by email. You won't go to the store and purchase them... That's a very different application model than we've ever seen in computing.”

— Eric Schmidt

**ANNOUNCING
TODAY**

SCOoffice Server 4.2 Maintenance Pack 1

- Domain-specific branding
- Rich-Text Editor for composing email
- Expanded Contacts database
- Maintenance, including clamAV update
- Other features

2009
FUTURE

2009
FUTURE

OpenServer 5.0.7 V
A 5.0.7 Virtual Machine
for VMware

UnixWare 7.1.4 V
A 7.1.4 Virtual Machine
for VMware

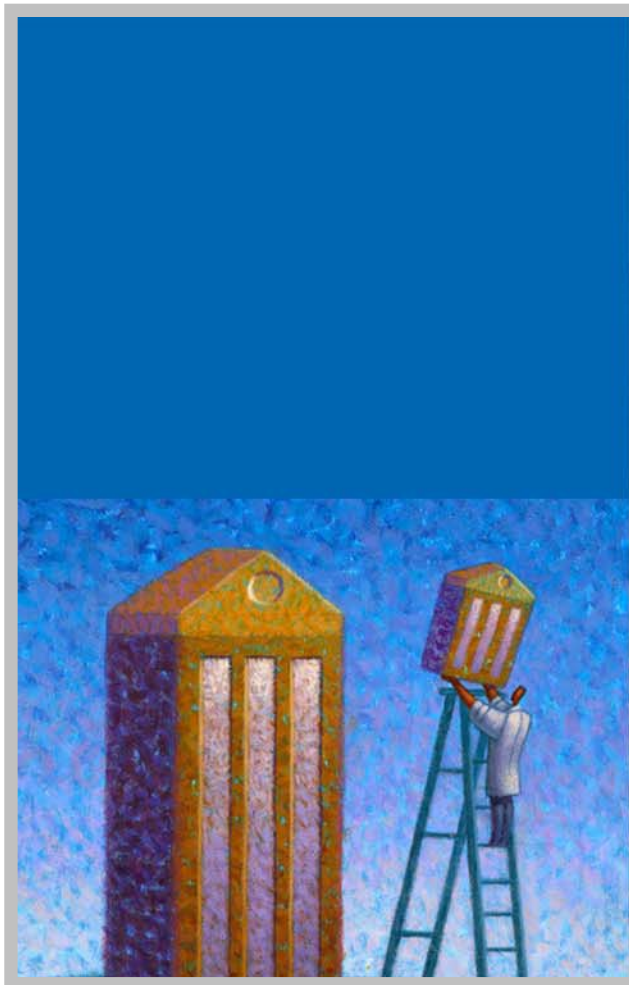

OpenServer 6.0.0 V
An OSR6 Virtual Machine
for VMware

All above virtual machines will provide
growing support for VMware tools.

Technical Support Programs are available now.

Stephen L. Norris was a co-founder of The Carlyle Group in Washington, DC serving as president of its management company from its inception in 1987 to 1996. He also served on the board of directors of major Carlyle portfolio companies, was actively involved in recruiting all of Carlyle's current senior partners and played a major role in recruiting George W. Bush to serve as director of one of its portfolio companies in addition to enlisting former Secretary of State James Baker III and former Secretary of Defense Frank C. Carlucci to be senior partners of Carlyle.

Darl C. McBride The SCO Group's President and Chief Executive Officer and as a member of the Board of Directors. Prior to joining SCO, Mr. McBride held a number of executive positions. He served as the president of FranklinCovey Co.'s online planning business from May 2000 to May 2002. From April 1999 to May 2000, Mr. McBride was the CEO of Pointserve. From November 1997 to August 1998, Mr. McBride was the Chairman, President and CEO of SBI.
