

High Surrogate Area

Range: D800-DBFF

Isolated surrogate code points have no interpretation; consequently, no character code charts or names lists are provided for this range.

See <http://www.unicode.org/charts/> for access to a complete list of the latest character code charts.

About This File

This file may be changed at any time without notice to reflect errata or other updates to the Unicode Standard.

See <http://www.unicode.org/errata/> for an up-to-date list of errata.

For a complete understanding of high-surrogate code units low-surrogate code units, and surrogate pairs used for the UTF-16 encoding form, see the appropriate sections of the Unicode Standard, online at <http://www.unicode.org/versions/latest/>

Terms of Use

You may freely use these code charts for personal or internal business uses only. You may not incorporate them either wholly or in part into any product or publication, or otherwise distribute them without express written permission from the Unicode Consortium. However, you may provide links to these charts.

The fonts and font data used in production of these code charts may NOT be extracted, or used in any other way in any product or publication, without permission or license granted by the typeface owner(s).

The Unicode Consortium is not liable for errors or omissions in this file or the standard itself. Information on characters added to the Unicode Standard since the publication of the most recent version of the Unicode Standard, as well as on characters currently being considered for addition to the Unicode Standard can be found on the Unicode web site.

See <http://www.unicode.org/pending/pending.html> and <http://www.unicode.org/alloc/Pipeline.html>.
