Judith Hellerstein:@owen neither did I

Kristine Dorrain:Oh good grief. I didn't know yellow icons were a thing either.

Heidi Ullrich:You are very welcome, Cheryl.

Kristina Hakobyan:Do the person need to be government representative to join the GAC?

Zakir:Yes. membership details on GAC website.

Mona Elswah:Will disinformation concerns discussed?

Abdulkarim Oloyede:(Question) Would GAC be addressing issues rasied from the ITU plenipotentiary confrence last year

Kristina Hakobyan:Thanks, Zakir.

Zakir:@Mona , thats a good topic but focus at icann meetings is generally not related to "content" but to DNS matters.

Cheryl Langdon-Orr (@CLO3):Thank you @Rob

Michele Neylon:Content is outside ICANN's scope

Zakir:exactly.

Cheryl Langdon-Orr (@CLO3):Thanks you @Andrew

Robert Hoggarth:@Abdulkarim – Thank you for your question. The full GAC agenda can be found here
– https://urldefense.proofpoint.com/v2/url?u=https-3A__gac.icann.org_agendas_icann64-2Dkobe-2Dagenda&d=DwIFaQ&c=FmY1u3PJp6wrcrwll3mSVzgfkbPSS6sJms7xcl4I5cM&r=k7uKdjSb7_ZjItyVqrCYHo_rKms9SFxlmbYEJqG-y9I&m=wbdHbPktRRLkx1r4f8cG6veLHEhCwwKH7jX149KAlBA&s=iTuNS4m0DSG2NSKPH5xFIYl7-11592NaVylwgNJYeGg&e=. While the GAC and ALAC are planning to discuss topic raised during the recent IGF meeting during their bilateral meeting on Wednesday in Kobe, there is no session on the agenda focused on ITU topics follow-up.

Cheryl Langdon-Orr (@CLO3):Thanks @Steve busy time for SSAC.

Nathalie Coupet:Is there a document to consult on what name collision is?

Nathalie Coupet:Technically

Syuzan Marukhyan:Thank you very much for a comprehensive webinar. I would like just to make a small comment/proposal.In my opinion, it would be good, if these important webinars are organized immediately after the official meeting schedule is released, so that the newcomers are able to make a more informed choice of those meetings that they would like to participate. Thank you once again.

David McAuley:Thanks to all presenters, very helpful

Steve Sheng:@Nathalie, the definition of name collision is the first task of the proposed study.

Zakir:very comprehensive and to the point. helpful indeed.

Nathalie Coupet:Thank you @Steve

David Olive:@Syuzan,   thanks for your comments. We are trying to prepare people for the ICANN meeting with a pilot breifing week -- this week

Steve Sheng:A previous definition can be found in SAC062.

Steve Sheng:https://urldefense.proofpoint.com/v2/url?u=https-3A__www.icann.org_en_system_files_files_sac-2D062-2Den.pdf&d=DwIFaQ&c=FmY1u3PJp6wrcrwll3mSVzgfkbPSS6sJms7xcl4I5cM&r=k7uKdjSb7_ZjItyVqrCYHo_rKms9SFxlmbYEJqG-y9I&m=wbdHbPktRRLkx1r4f8cG6veLHEhCwwKH7jX149KAlBA&s=y7AmBOZrP_U_rhUTL9XgydFP4SGcebUDZASVWIUtQyg&e=

Steve Sheng:In the context of top level domains, the term "name collision" refers to the situation inwhich a name that is properly defined in the global Domain Name System (DNS)namespace (defined in the root zone as published by the root management partners -ICANN, U.S. Dept. of Commerce National Telecommunication InformationAdministration (NTIA), and VeriSign) may appear in a privately defined namespace (inwhich it is also syntactically valid), where users, software, or other functions in thatdomain may misinterpret it.

Diego Canabarro:is NTIA a "root management partner" even after the transition, @steven?

Diego Canabarro:or the definition is outdated?

Diego Canabarro:*steve.. sorry!

Steve Sheng:Yes, this definition is outdated.

Diego Canabarro:great! Thank you.

Steve Sheng:Because we already have the IANA transition.

Vrikson Acosta:@Syuzan, great proposal :)
