WordPerfect®
INTELLIGENT WORD PROCESSING

The World's Best-Selling Word Processor for OpenVMS™ Systems

WordPerfect for OpenVMS Systems combines the world's best-selling word processor with the power and performance of the OpenVMS System. Selected as Compaq Corporation's® "preferred document processing software," WordPerfect 5.3 on your OpenVMS Systems gives your organization the following benefits...

...it's the most versatile and powerful communications solution for today's OpenVMS users.

Empower Your OpenVMS Users

Standardize your corporate word processing across platforms. WordPerfect 5.3 now provides full compatibility with WordPerfect running on other platforms so that other users or work groups using different operating systems can share information and projects quickly and easily.

Integrate text and graphics in order to improve the impact of everything you produce—from memos and documents, to letters, reports, and more.

Save on training costs! WordPerfect 5.3 is the logical choice for users already familiar with WordPerfect on another platform. And for users migrating to WordPerfect from another word processor, 5.3's enhanced keyboard mapping tools make the transition easy and painless.

Print to any of the over 1,000 printers (and growing!) supported by WordPerfect 5.3 for OpenVMS Systems.

Link spreadsheets and graphics to your document. If changes are made to the spreadsheet or graphic image, your document will be automatically updated when it is retrieved.

Improve productivity with powerful WordPerfect features like Tables, Equation Editor, View Document, Macro Editor, Merge tools, Character Sets, Pull-Down Menus, and much more!

Languages available include U.S. English, U.K. English, Danish, Dutch, Finnish, French, German, Italian, Norwegian, Spanish, Swedish, and Swiss!

New in Corel WordPerfect 5.3 for OpenVMS

WordPerfect's reputation is built on powerful and innovative word processing features – which quickly become standards – as well as responsiveness to the demands of users in the form of new features, enhancements, and updates. In addition to the powerful features and capabilities found in previous versions, WordPerfect 5.3 contains the following exciting improvements:

WordPerfect 6.0 File Compatibility:
WordPerfect 5.3 for VMS converts WordPerfect 6.0 (and 3.0 for Macintosh) files as they are retreived.

Increased Performance
Significant improvements to WordPerfect 5.3 have made it more than 20% faster than the previous version!

Macro Editor
The powerful Macro Editor provides users with a comprehensive set of tools for creating, navigating through, editing, and printing the contents of their WordPerfect macros.

Printer Drivers
Printer drivers (.prs files) have been added for the HP® LaserJet® 4 printer series.

List Files
The List Files program can now be run from DCL™, allowing users to navigate through OpenVMS to view, copy, find, move, print, and manage their files and directories without having to know OpenVMS commands!

WPS-PLUS Keyboard Emulation
With the enhanced WPS-PLUS® keyboard selected, training costs are

minimized because former WPS-PLUS users can use WPS-PLUS keystrokes to perform WordPerfect tasks.

WPS-PLUS Document Conversion
The improved document conversion feature quickly and easily converts WPS-PLUS documents into WordPerfect documents.

VT510™ Terminal Support
WordPerfect 5.3 supports the additional foreign character sets and soft characters now available with the VT510 terminal.

ALL-IN-1™ Integration
The ALL-IN-1 integration package is now available for WordPerfect 5.3.
