

CONTAINS	An emulsifiable concentrate formulation containing 75 g/L (7.4% w/w) bixafen and 150 g/L (14.8% w/w) prothioconazole.
CONTROLS	A fungicide for the control of stem-base, foliar and ear diseases in winter and spring wheat, triticale and winter rye.

PCS 03687

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Aviator Xpro is a mixture of a carboxamide and triazolinthione fungicide recommended for control of a wide range of diseases on winter and spring wheat, winter rye and triticale.

RATE OF USE

CROP	MAXIMUM INDIVIDUAL DOSE	MAXIMUM NUMBER OF APPLICATIONS	LATEST TIME OF APPLICATION
Winter and spring wheat, winter rye, triticale	1.25 litres product per hectare	2 per crop	Before grain milky ripe stage, (GS 73)

Method of application: Tractor mounted sprayer

A spray pressure of 2-3 bar is recommended.

Apply Aviator Xpro in 100-300 litres per hectare water.

Apply as a **MEDIUM** spray quality.

fungicide

CROPS

Aviator Xpro may be used on all commercial varieties of winter and spring wheat, triticale and winter rye.

APPLICATION

Water volume

Apply Aviator Xpro in 100-300 litres per hectare water. The higher spray volumes are recommended where the crop is dense or disease pressure / risk is high to ensure good penetration to the lower leaves and stem bases. Disease control may be compromised by reducing water volumes, where good spray coverage is difficult to achieve.

Latest Permitted Timing

In wheat and rye Aviator Xpro may be applied at any stage before grain milky ripe stage.

Mixing

THOROUGHLY SHAKE THE PACK BEFORE USE.

Add the required quantity of Aviator Xpro to the half-filled spray tank with the agitation system in operation and then fill to the required level. Continue agitation at all times during spraying and stoppages until the tank is completely empty. Spray immediately after mixing.

General

Sprayers should be thoroughly cleaned with water and detergent after use, and filters and jets checked for damage and blockages.

Boom height should be adjusted to ensure even coverage of the crop, particularly at later growth stages. The correct height is one at which the spray from alternate nozzles meets just above the crop, In dense crops, at later growth stages, higher water volumes should be used.

DISEASES CONTROLLED

	WHEAT	TRITICALE	RYE
Eyespot (<i>Oculimacula</i> spp.)	R	R	R
Septoria Leaf Blotch (<i>Mycosphaerella graminicola</i>)	C	C	C
Glume Blotch (<i>Septoria nodorum</i>)	C		C
Powdery Mildew (<i>Blumeria graminis</i>)	C	C	C
Yellow Rust	C	C	
Brown Rust	C	C	C
Tan Spot	C		
Fusarium Ear blight	MC	MC	
Sooty Moulds	R	R	
Rhynchosporium Leaf Blotch			C

C = Control. MC = Moderate control. R= Reduction.

APPLICATION TIMING

Eyespot (*Oculimacula* spp.)

Spray in the spring at the first sign of disease, from when the leaf sheaths begin to become erect until the 2nd node is detectable (GS 30-32).

Septoria Leaf Blotch and Glume Blotch (*Mycosphaerella graminicola* and *Stagonospora nodorum*)

Apply before disease is established in the crop. To protect the upper leaves and ear apply Aviator Xpro at full flag leaf emergence (GS 37) up to mid-flowering (GS 65). Where disease pressure remains high application may be repeated.

Applications to upper leaves where *S. tritici* symptoms are present are likely to be less effective.

Aviator Xpro contains a DMI fungicide. Resistance to some DMI fungicides has been identified in *Septoria* leaf blotch (*Mycosphaerella graminicola*) which may seriously affect the performance of some products. For further advice on resistance management in DMI's contact your agronomist or specialist advisor, and visit the FRAG-UK website.

Powdery Mildew (*Blumeria graminis*)

Apply Aviator Xpro at the first signs of disease. Where disease pressure remains high application may be repeated.

Yellow Rust (*Puccinia striiformis*)

Apply Aviator Xpro at the first signs of disease. A second application may be made 2-3 weeks later if re-infection occurs. Applications made to established infections are likely to be less effective.

Brown Rust (*Puccinia triticina*, *P. recondita*)

Apply Aviator Xpro at the first signs of disease. A second application may be made 2-3 weeks later if re-infection occurs. Applications made to established infections are likely to be less effective.

Tan Spot (*Pyrenophora tritici-repentis*)

Apply Aviator Xpro at the first signs of disease in spring or early summer. Where disease pressure remains high application may be repeated.

Ear Disease Complex

Apply Aviator Xpro soon after ear emergence until the end of flowering (GS59-69) for moderate control of *Fusarium* ear blight in wheat and reduction of sooty moulds. Control of ear diseases can result in cleaner, brighter ears.

Leaf Blotch (*Rhynchosporium secalis*)

Apply Aviator Xpro in spring at the first signs of disease. For severe infections a second application may be necessary 2-3 weeks later.

RESISTANCE STRATEGY

Repeated application of Aviator Xpro alone should not be used on the same crop against a high risk pathogen such as cereal powdery mildew. Tank-mixtures or alternation with fungicides having a different mode of action (e.g. morpholines) have been shown to protect against the development of resistant forms of disease.

No more than two applications of SDH inhibitors must be applied to the same cereal crop.

CAUTION: The possible development of disease strains resistant to Aviator Xpro cannot be excluded or predicted. Where such resistant strains occur, Aviator Xpro is unlikely to give satisfactory control.

SAFETY PRECAUTIONS

Operator Protection

WHEN USING DO NOT EAT, DRINK OR SMOKE.

WASH ANY CONTAMINATION from eyes immediately.

WASH HANDS AND EXPOSED SKIN before meals and after work.

IF YOU FEEL UNWELL, seek medical advice (show the label where possible).

Environmental Protection

Do not allow direct spray from horizontal boom sprayers to fall within 5 m of the top of the bank of a static or flowing water body or within 1 m of the top of a ditch, which is dry at the time of application.

Aim spray away from water.

Storage and Disposal

KEEP IN ORIGINAL CONTAINER tightly closed in a safe place.

WASH OUT CONTAINER THOROUGHLY, empty washings into spray tank and dispose of safely.

DO NOT RE-USE CONTAINER for any purpose.

PROTECT FROM FROST.

READ ALL INSTRUCTIONS CAREFULLY BEFORE USE.

RISK AND SAFETY INFORMATION

AVIATOR XPRO

Contains 75 g/L (7.4% w/w) bixafen and 150 g/L (14.8% w/w) prothioconazole.

IRRITANT

**DANGEROUS
FOR THE
ENVIRONMENT**

IRRITATING TO EYES.

VERY TOXIC TO AQUATIC ORGANISMS, MAY CAUSE LONG-TERM ADVERSE EFFECTS IN THE AQUATIC ENVIRONMENT.

This material and its container must be disposed of in a safe way.

Keep out of the reach of children.

Wear suitable protective clothing and gloves.

Wear eye/face protection.

Keep away from food, drink and animal feedingstuffs.

Use appropriate containment to avoid environmental contamination.

To avoid risks to man and the environment, comply with the instructions for use.

PACK SIZE

5 L
