

## Bulletin 1: Population characteristics

A census of the population of Jersey was held on 21 March 2021.

### The total resident population of Jersey on 21 March 2021 was 103,267.

This figure:

*includes* 2,205 residents of Jersey who were absent from the Island on Census Day; and

*excludes* 480 short-term visitors to the Island who were present on Census Day.

At the time of the 2021 census, Jersey had several restrictions in place in respect of travel, commerce and social events as a result of the ongoing Covid-19 pandemic. Please see the [notes](#) for further details of these restrictions.

The effects of the travel restrictions are apparent; the number of short-term visitors (480) is around a quarter of that recorded at the 2011 Census (2,052). The number of Jersey residents absent from the Island on Census Day 2021 was around a third of that recorded at the 2011 Census (2,205 persons compared with 6,061 respectively).

### Change over time

The 2011 Census reported a resident population of 97,857. The change in the census measures of the Island's resident population between 2011 and 2021 is broken down in Table 1.

**Table 1: Contribution to change between 2011 and 2021 census measures**

*Numbers are rounded to the nearest 100 to reflect the accuracy of these estimates*

	Contribution to change
Natural growth (excess of births over deaths)	2,100
Net migration ( <i>into</i> the Island)	3,300
<b>Total change in census measures 2011 – 2021</b>	<b>5,400</b>

The resident population increased by 5,400 between 2011 and 2021, corresponding to an increase of 5.5% over 10 years.

The resident population of Jersey has been increasing over the last 70 years (see Figure 1).

**Figure 1: Resident population 1951 - 2021**

## Dwellings

The 2021 Census identified 48,610 private dwellings<sup>1</sup> and 162 communal establishments in Jersey.

The number of private dwellings in Jersey increased by 9% (3,912 dwellings) in the 10 years since the 2011 Census (which recorded 44,698 dwellings).

## Vacant dwellings

A total of 4,027 private dwellings were identified as vacant on Census Day, corresponding to a vacant rate of 8.3%.

Both the number and proportion of vacant properties has increased in 2021 compared to 2011. The 2011 Census recorded 3,103 vacant dwellings – a vacant rate of 6.9%.

## Persons per dwelling

Excluding those living in communal establishments, 101,188 people were living in 44,583 dwellings in 2021, representing an average of 2.27 persons per dwelling. This ratio has been declining over the last five decades as can be seen in Figure 2.

Figure 2: Number of persons per private dwelling 1971 - 2021

<sup>1</sup> Private dwellings as measured by the census are not necessarily separate physical dwellings; in the census separate dwellings were identified where the occupants shared a living space and a cooking area and may not necessarily correspond to a dwelling with a separate entrance. For example, a lodger in a private household was counted as living in a separate dwelling if there was a separate living space and cooking facilities for their use.

## Population by parish

Table 2 shows the distribution of the population by parish. St Helier accounted for over a third (35%) of the total population of Jersey in 2021, followed by St Saviour (13%) and St Brelade (11%). The smallest parish in terms of population size was St Mary.

Table 2: Population and population density by parish

	<b>2021 population</b>	<b>% of total</b>	<b>2021 density (person/km<sup>2</sup>)</b>	<b>2011 population</b>	<b>% change population</b>
Grouville	5,401	5	658	4,866	11
St Brelade	11,012	11	830	10,568	4
St Clement	9,925	10	2,262	9,221	8
St Helier	35,822	35	3,716	33,522	7
St John	3,051	3	332	2,911	5
St Lawrence	5,561	5	566	5,418	3
St Martin	3,948	4	384	3,763	5
St Mary	1,818	2	277	1,752	4
St Ouen	4,206	4	274	4,097	3
St Peter	5,264	5	448	5,003	5
St Saviour	13,904	13	1,498	13,580	2
Trinity	3,355	3	267	3,156	6
<b>TOTAL</b>	<b>103,267</b>	<b>100</b>	<b>859</b>	<b>97,857</b>	<b>6</b>

The greatest percentage changes in population between 2011 and 2021 were seen for Grouville (11%), St Clement (8%) and St Helier (7%). Notably small increases in population during this decade were seen in St Saviour (2%), St Ouen (3%) and St Lawrence (3%).

Age and sex

Figure 3 illustrates the number of people by age group and sex.

Figure 3: The population structure of Jersey

There were 25 people aged 100 years or over at the time of the census, the majority of whom were female.

### Working age population

As Table 3 shows, 68,055 people were aged between 16 and 64 years of age. This is the OECD definition of working age and provides an internationally comparable measure of potential workforce size.

The dependency ratio for Jersey (the ratio of those outside of working age to those of working age) was 52%; this ratio has increased from 46% in 2011.

Table 3: Working age population of Jersey

	Males	Females	All
Under 16 years	8,340	8,136	16,476
16-64 years (working age)	34,132	33,923	68,055
65+	8,531	10,205	18,736
<b>Total</b>	<b>51,003</b>	<b>52,264</b>	<b>103,267</b>
Dependency ratio	49%	54%	52%
Percent at working age	67%	65%	66%

Figure 4 shows the change in each age group over the last 10 years. The number of residents aged 16-64 was essentially unchanged between 2011 and 2021 (increasing by 1%), whilst the number of people aged 65 and over increased by over a quarter (29%).

Figure 4: Working age population, 2011 and 2021 compared

## Gender identity

A new question on gender identity was introduced for the 2021 census. The question was voluntary and only asked of adults aged 16 or over. Around one in ten adults (9.2%) chose not to answer the question.

There were 189 adults (0.2% of the adult population) who reported that their gender was not the same as the sex they were registered at birth.

Table 4: Is your gender the same as the sex you were registered at birth? (adults aged 16 or over)

	Persons	Percent
Yes	78,576	90.5
No	189	0.2
Prefer not to say	8,026	9.2
<b>All adults</b>	<b>86,791</b>	<b>100</b>

## Sexual orientation

A question on sexual orientation was asked for the first time in the 2021 census. The question was voluntary and only asked of adults aged 16 or over. Around one in ten adults (10.7%) chose not to answer this question.

The majority of adults (87%) stated that they identified as straight or heterosexual, whilst 2.0% identified as either gay, lesbian or bisexual. A further 0.2% of the adult population stated another sexual orientation.

The proportion of adults identifying as either lesbian, gay or bisexual in Jersey in 2021 (2.0%) was lower than that estimated for the UK in 2019<sup>2</sup> (2.7%).

Table 5: Sexual orientation, (adults aged 16 or over)

	Persons	Percent
Straight / heterosexual	75,513	87.0
Gay or lesbian	1,106	1.3
Bisexual	640	0.7
Another sexual orientation	203	0.2
Prefer not to say	9,329	10.7
<b>All adults</b>	<b>86,791</b>	<b>100</b>

<sup>2</sup> Office for National Statistics, [Annual Population Survey 2019](#)

## Place of birth

In 2021, half (50%) of Jersey residents were born in Jersey. Nearly a third (29%) were born in the British Isles<sup>3</sup>, 8% were born in Portugal / Madeira and 3% were born in Poland.

Table 6: Jersey's population by place of birth

	Persons	Percent	Change 2011-2021
Jersey	51,274	50	+2,621
British Isles	29,598	29	-625
Portugal / Madeira	8,280	8	+1,249
Poland	2,808	3	-325
Ireland (Republic)	1,624	2	-238
France	733	1	-124
Other European country	3,493	3	+1,215
Elsewhere in the world	5,439	5	+1,648
<b>Total</b>	<b>103,267</b>	<b>100</b>	<b>5,410</b>

Of the people who reported being born in an 'other European country' or 'elsewhere in the world', the top 10 most frequent countries of birth are shown in Table 7. The largest change was seen for people born in Romania which increased by 875 people since 2011.

Table 7: Place of birth in 'other European country' or 'elsewhere in the world': most frequently cited countries

Place of birth	Persons	Change 2011-2021
Romania	1,338	+875
South Africa	934	+363
India	410	+85
The Philippines	396	+228
Germany	371	+15
Zimbabwe	350	+221
Venezuela	345	+185
Australia	296	-7
Thailand	267	+52
United States of America	227	+34

<sup>3</sup> Including England, Scotland, Wales, Northern Ireland and other Channel Islands

Changes over time

As Figure 5 illustrates, the number of Jersey residents who were born in Jersey has increased throughout the last four decades. Although at a lower level, the number of Jersey residents who were born in Portugal / Madeira has also been increasing over the same time period.

In the last two decades there has been an increase in the number of Jersey residents who were born in other European countries. In the latest 10-year period this was largely due to an increase in people born in Romania, whilst in the 10 years to 2011 the increase was predominantly driven by people born in Poland.

Figure 5: Place of birth of Jersey residents over the last four decades, as measured by census

\*Includes Poland so that comparisons with previous census data can be made

The proportion of Jersey-born residents (50%) was essentially unchanged in the latest 10-year period (see Table 8).

Over the last four decades the proportion of Jersey-born residents has declined, despite the ongoing increase in the number of Jersey-born residents. This is a result of concurrent increases in non-Jersey born residents.

Table 8: Place of birth of Jersey residents over the last four decades, as measured by census (percent, rounded to the nearest integer)

	1981	1991	2001	2011	2021
Jersey	53	52	53	50	50
British Isles	37	37	34	31	29
Portugal / Madeira	3	4	6	7	8
France	2	1	1	1	1
Elsewhere	5	6	7	11	13
<b>Total</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

## Net migration

Figure 6: Net migration, by place of birth, 2001 to 2011 and 2011 to 2021

(net inward migration is above the axis, net outward migration below)

Numbers are rounded to the nearest 100 to reflect the accuracy of these estimates.

\*EU Accession (2004): Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Slovenia; Cyprus and Malta; and Enlargement (2007): Bulgaria, Romania.

Between 2011 and 2021 there was total net migration of 3,300 people into Jersey. This has reduced from the figure of 6,800 that was observed in the previous census period (2001 to 2011).

In the most recent 10-year period, there was substantially reduced net migration from EU Accession countries (in particular from Poland) and small increases were observed in migration from elsewhere in Europe and the rest of the world. Migration from the British Isles was the largest positive contributor to overall net migration, while there was a net loss of 3,600 Jersey-born individuals.

The Appendix provides more detail on the year of arrival of residents by place of birth.

## Ethnicity

While place of birth is informative, a person's self-reported ethnicity can give a different perspective. For example, someone born outside of Jersey who has lived in the Island for many years might consider themselves of 'Jersey' ethnicity. On the other hand, someone else born in Jersey but with parents from outside of the Island may consider their parental or cultural heritage to be the key influence in defining their ethnicity.

The 2021 Census asked residents of Jersey to identify which ethnic category they felt best described themselves. Fewer than half (44%) of Jersey residents considered their ethnicity to be 'Jersey', whilst almost a third considered themselves to be 'British'.

About one in eleven (9%) Jersey residents considered themselves to be Portuguese or Madeiran: representing almost 1,500 more people than those who were born in Portugal or Madeira.

See Table 9 for a breakdown of the ethnicity of Jersey residents in 2021 and 2011.

Table 9: Ethnicity of Jersey residents, 2021 and 2011

		2021	Percent	2011	Change 2011-2021
<b>White</b>	Jersey	45,849	44.4	45,379	+470
	British	31,534	30.5	31,974	-440
	Irish	2,199	2.1	2,324	-125
	French	692	0.7	841	-149
	Polish	3,080	3.0	3,273	-193
	Portuguese / Madeiran	9,739	9.4	8,049	+1,690
	Romanian*	1,427	1.4	454	+973
	South African*	716	0.7	326	+390
	Other	3,737	3.6	2,951	+786
<b>Asian</b>	Indian	632	0.6	377	+255
	Thai	267	0.3	200	+67
	Chinese	190	0.2	182	+8
	Other	853	0.8	456	+397
<b>Black</b>	African	764	0.7	256	+508
	Caribbean	145	0.1	85	+60
	Other	66	0.1	38	+28
<b>Mixed</b>	Black and White	449	0.4	692	+685
	White and Asian	503	0.5		
	Other**	425	0.4		

\*These were not listed as separate options on the 2011 form and were contained in the "other white" write-in option

\*\*Includes the 'Mixed – Asian and Black' category (approximately 10 people)

## Residential / employment status

Only people over the age of 15 years are eligible to have a residential / employment status, and consequently this section refers to the 86,791 residents who were aged 16 or over on Census Day.

Over four-fifths (86%) of adults had Entitled status, meaning they had lived in Jersey for at least 10 years, could buy, lease or sell any property and work for any employer. A further 2% had Licenced status through being essentially employed.

Some 6% of adults were Entitled for work, meaning they had lived in Jersey for 5 years immediately before their status was granted<sup>4</sup>, were restricted in buying and leasing property but could work for any employer.

Approximately one in twenty adults (5%) had Registered status and therefore did not qualify under any of the other categories (see Table 10).

**Table 10: Residential / employment status of residents**

	Persons	Percent
Entitled	74,681	86
Licensed	2,106	2
Entitled for work	5,454	6
Registered	4,550	5
<b>Total</b>	<b>86,791</b>	<b>100</b>

Comparison with 2011 is only broadly comparable due to the changes in residential housing qualifications implemented in July 2013 under the Control of Housing and Work (Jersey) Law 2012.<sup>5</sup>

In 2011, 16% of the adult population did not have residential housing qualifications. The proportion of adults with the equivalent status in 2021 has decreased to 11%. (people either Registered or Entitled for work).

Table 11 provides the breakdown of each residential category by place of birth. It shows for example that the majority of Licensed residents were born in the British Isles. The majority of residents born in Poland and Portugal / Madeira had Entitled status (68% and 75% respectively).

The largest shift in residential status by place of birth in 2021 compared to 2011 was seen for residents born in Poland. In 2021 the majority (68%) had Entitled status, compared to 4% in 2011 who were “locally qualified”<sup>6</sup>.

<sup>4</sup> Or is married to or the civil partner of someone who is Entitled, Entitled to work or Licensed.

<sup>5</sup> The residential qualifications applicable at the time of the 2011 Census were through the Regulation of Undertakings and Development (Jersey) Law 1973.

<sup>6</sup> Possessing either a-h or k-category residential qualifications

Table 11: Residential qualifications of adults by place of birth

	Jersey	British Isles	Ireland	Poland	Portugal/ Madeira	Other European country	Elsewhere in the world	All
<b>Entitled</b>	37,300	23,360	1,450	1,850	6,010	2,060	2,660	74,680
<b>Entitled for work</b>	30	2,130	70	400	1,060	890	880	5,450
<b>Licensed</b>	~	1,150	40	20	60	170	670	2,110
<b>Registered</b>	30	1,470	50	470	920	860	760	4,550
<b>Total</b>	<b>37,360</b>	<b>28,110</b>	<b>1,620</b>	<b>2,730</b>	<b>8,040</b>	<b>3,970</b>	<b>4,970</b>	<b>86,790</b>

(Numbers have been independently rounded to the nearest 10. The symbol '~' indicates a value less than 10.)

## Length of residence

Table 12 shows the number of residents by their year of arrival in Jersey. It should be noted that the numbers represent those arriving in the Island in each year and remaining in Jersey, and will not include any who have since left the Island.

In 2021, three-quarters (75%) of residents had lived in the Island for more than 10 years.

**Table 12: Number of residents by year that their current period of residence in Jersey began**

	<b>Arrived in Jersey*</b>	<b>Percent</b>	<b>Whole population</b>	<b>Percent</b>
Prior to 1980	10,924	20%	30,174	29%
1980 - 1989	6,175	11%	11,642	11%
1990 - 1999	7,604	14%	14,471	14%
2000-2009	11,467	21%	19,320	19%
2010	1,172	2%	2,063	2%
2011	1,386	3%	2,278	2%
2012	1,128	2%	2,084	2%
2013	1,154	2%	2,048	2%
2014	1,300	2%	2,150	2%
2015	1,598	3%	2,504	2%
2016	1,576	3%	2,494	2%
2017	1,592	3%	2,441	2%
2018	1,922	4%	2,777	3%
2019	2,026	4%	2,864	3%
2020	2,289	4%	3,112	3%
2021 (up to 21 March)	635	1%	845	1%
<b>Total</b>	<b>53,948</b>	<b>100%</b>	<b>103,267</b>	<b>100%</b>

*\*not including those born in Jersey and continuously resident since birth – but including returning Jersey-borns.*

Further detail of the place of birth, age, sex and residential qualifications by year of arrival can be found in the Appendix.

## Recent arrivals

People whose most recent period of residence in Jersey began after 2015 are considered for the purposes of this report to be ‘recent arrivals’. This section describes the characteristics of this group who arrived in Jersey during the five years prior to Census Day.

Two-fifths (41%) of recent arrivals were born in the British Isles – see Table 13. Around one in five (21%) were born “Elsewhere in the world”.

Similar proportions of recent arrivals, around one in eight, were born in Portugal / Madeira (13%) or “other European countries” (12%).

**Table 13: Place of birth of recent arrivals, 2016 to 2021**

	<b>Persons</b>	<b>Percent</b>
Jersey	453	5
British Isles	4,148	41
Portugal / Madeira	1,310	13
Poland	573	6
Ireland (Republic)	130	1
France	130	1
Other European country	1,198	12
Elsewhere in the world	2,098	21
<b>Total</b>	<b>10,040</b>	<b>100</b>

Around half (53%) of recent arrivals had Registered status (Table 14). Around 1,500 people with Licensed status (essential employees) had moved to Jersey in the five years prior to Census Day.

**Table 14: Residential qualifications of recent arrivals 2016 to 2021 (aged 16 or over)**

	<b>Persons</b>	<b>Percent</b>
Entitled	1,058	12
Entitled for work	1,487	17
Licensed	1,499	18
Registered	4,500	53
<b>Total</b>	<b>8,544</b>	<b>100</b>

Figure 7 shows the age profile of recent arrivals at the 2011 and 2021 censuses. The reduction in the number of recent arrivals aged 20 to 34 years in 2021 compared with 2011 is apparent (down 35%). At the 2021 Census around half (54%) of recent arrivals were below 35 years, compared to almost two-thirds of recent arrivals (64%) at the 2011 census.

Figure 7: Age profile of recent arrivals (within 5 years of census), 2011 and 2021 censuses

## Acknowledgements

The 2021 Jersey census project was undertaken by Statistics Jersey. We would like to thank everyone who has been involved in delivering the Jersey Census, particularly Islanders for responding so positively; the field staff who supported Islanders who needed help; and the members of the census office team.

## Notes

### Pandemic context

- The 2021 Census was run during the Covid-19 pandemic; as such, a number of restrictions were in place.
- At the time of the census all travel destinations were classified Red under Jersey's Safer Travel Policy. This had been introduced for UK destinations on 22 December 2020, and for all other destinations on 16 January 2021.
- This meant that all arrivals had to isolate for ten days and be PCR tested on arrival and at days five and ten. The return to a Red, Amber, Green classification for UK regions only, with differing restrictions, occurred on 26 April 2021. International destinations, including the Republic of Ireland, remained classified Red.
- The restriction preventing household mixing was lifted on 15 March 2021.
- Eat-in hospitality re-opened on 22 February 2021, with drinks-only hospitality re-opening on 2 April 2021.
- The recommended public health guidance at the time of the census was to work from home whenever possible, although this was not a legal requirement.

### Who was included

- Information was collected for everyone who was resident in Jersey on Census Day (Sunday 21 March 2021). A resident included anyone who was staying or intending to stay in Jersey for at least one month. People who were usually resident in Jersey, but temporarily away on Census Day, were also included.
- Limited information was also obtained for visitors (anyone intending to stay for less than one month) who were present in the Island on Census Day.
- People living in households, temporary accommodation, those without a permanent address, as well as people living in communal establishments such as hotels, care homes and the hospital were all included in the census.

### Fieldwork

- Four separate address lists were matched and combined to produce an initial list of all residential addresses in the Island. The lists used were: the Jersey Land and Property Index (JLPI), the Jersey Postal Address File (PAF), Jersey Parish Rates address list, Jersey Electricity list of residential dwellings.
- The resulting list was verified by census staff in advance of the census in late 2020 – i.e. all addresses were visited and checked, including identifying unlisted and temporary properties. If there was any doubt as to whether a dwelling should be included (e.g. properties under construction) they were left in the address list.
- Any new addresses added to the JLPI in the intervening period between the address checking fieldwork and Census Day were also added to the address list. This resulted in a list of over 50,000 residential addresses.
- The majority of questionnaires were delivered by post, with around 4,000 hand-delivered by census enumerators. The hand-delivered questionnaires were targeted to “hard to reach” addresses identified during the address checking fieldwork. This included dwellings such as lodging houses and flats with shared mailboxes.
- Non-responding households were sent a reminder letter, then a replacement questionnaire, before being visited, multiple times where required, until the end of June.

### Data processing

- The 2021 Census was carried out entirely on-Island, including processing and validation of the census returns.
- This approach allowed use of local knowledge and expertise throughout the entire census project and, particularly, enabled follow up of non-responding households to continue for several months after Census Day.
- Completed paper questionnaires were posted back to Statistics Jersey.
- Questionnaires were bar-coded to speed up the processing of the returns; bespoke software, designed in-house, was used to process the returns and to ensure data-entry and validation was efficient and accurate; vigorous quality assurance processes were put in place to maximise data quality.

### Methodological changes for the 2021 Census

- An online completion option was available for the first time. All households received a paper questionnaire containing a unique Household Access Code to complete the census online. 31% of households completed their census online.
- The majority of census questionnaires were delivered by Jersey Post, rather than by Census Enumerators. This meant that a much smaller census field team was engaged on and around Census Day, and there was minimal household contact as part of our Covid-safe measures.

### Undercount

- The 2021 Jersey census has incorporated the undercount into the census results. Jersey moved to this “one number” approach for the first time in 2011. (UK moved to this approach in 2001).
- 256 households failed to return a census questionnaire in 2021 and were classified as “Undercount” households; such households represented 0.5% of the total number of households.
- Reported numbers for 2021 represent all residents living in Jersey in 2021, including the small undercount
- Non-responding households are included by identifying the number and characteristics of such households and subsequently amending the census results.
- Administrative data, additional information collected by field staff and the application of statistical techniques were used to compile sufficient information on the characteristics of non-responding households to enable their inclusion.

### Validation and quality assurance

- A rigorous process of quality assurance took place, for example: internal consistency checks (eg. children older than parents), identifying duplicate households or people, ensuring visitors staying overnight at other addresses had been included at their usual residence, identifying outliers and missing data. In some instances households were contacted by phone to provide missing information.
- A careful process of validation was carried out against available administrative sources, to ensure the final reported census numbers were consistent with the known populations of:
  - births
  - preschool age
  - school age
  - working age
  - pension age
- Validation was also carried out on an individual level using administrative data sources through a process of automated and manual matching. Datasets used included:
  - Birth registrations (CLS / Office of the Superintendent Registrar)
  - Pre-school children (Dept of Health and Community Services)
  - School-age children (Dept of Children, Young People, Education and Skills)
  - Social Security registrations and contributions (Customer and Local Services, CLS)
  - Manpower returns (Population Office)

## Appendix – Detailed Data Tables

### A1. Population by age and sex

<i>Age (years)</i>	<i>Male</i>	<i>Female</i>	<i>All</i>	<i>Age (years)</i>	<i>Male</i>	<i>Female</i>	<i>All</i>
0	459	443	902				
1	469	381	850				
2	479	482	961	<b>0-4</b>	2,425	2,237	4,662
3	500	461	961

## A2. Population by place of birth and year when present period of residence began

(excluding the 49,319 persons who were born in Jersey and have been continuously resident since birth)

Numbers have been independently rounded to the nearest 10. The symbol '~' indicates a value less than 10.
