# 1 Guide to IPv4 Pre-approval in MyAPNIC

This guide explains how to submit your Pre-approval request from MyAPNIC.

## 1.1 Completing the Transfer Pre-approval form

In preparation for receiving IPv4 address transfers, the recipient account may choose to request pre-approval by completing the “Transfer Pre-approval” form, which can be found under the Resources menu of MyAPNIC. By getting pre-approval, the recipient account avoids having to demonstrate the need for receiving IP resources when a source of transfer is located and the transfer size is within the pre-approval.

## Resources

### Internet resources

**Summary**  
View all of your resource holdings.

**IPv4**  
View your IPv4 resource holdings.

**IPv6**  
View your IPv6 resource holdings.

**AS Numbers**  
View your ASN resource holdings.

### Whois Updates

**Whois Updates**  
Add, update, and delete individual Whois objects.

**Bulk Whois Updates**  
Add, update, and delete multiple Whois objects.

**Maintainers**  
View your registered maintainers, and register new maintainers.

**IRTs**  
View your registered IRT objects, and register new IRT objects.

### Reverse DNS Delegations

**Add Reverse Delegations**  
Add new reverse delegations.

### Resource request forms

**IPv4 Addresses**  
Apply for an IPv4 address delegation.

**IPv6 Addresses**  
Apply for an IPv6 address delegation.

**AS Numbers**  
Apply for an ASN delegation.

### Resource transfer/return

**Transfer Resources Into Another Account**  
Initiate a transfer of resources from your account to another account.

**Receive Resources Into My Account**  
Receive resources transferred from another account to your account.

**Request Transfer Pre-approval**  
Pre-approval streamlines the transfer process by allowing justification to be provided before a transfer is initiated.

**Return IPv4 Resources**  
Return IPv4 resources to APNIC.

### Resource certification

**RPKI**  
Set up your RPKI engine, and manage your Route Origin Authorization (ROA) objects.

## Request Transfer Pre-approval

Terms and Conditions

### Terms and conditions

This form is used by the recipient account before locating the source of the IPv4 transfer and to facilitate a smooth transfer when a source account is ready to relinquish their addresses.

Before you proceed, please read the following terms and conditions carefully.

1. APNIC policy requires that recipients of IPv4 address transfers justify their need for additional addresses. The pre-approval requests must meet the IPv4 transfer policy criteria.

<http://www.apnic.net/policy/transfer-policy>

2. Pre-approvals are valid for 24 months from the date of approval. If another pre-approval is requested and approved within that period, it will replace the previous pre-approval.

3. The recipient account must remain "open" to receive any transfer.

4. The recipient account will be required to provide additional justification when the size of transfer to receive is larger than what has already been pre-approved.

I agree to the terms and conditions

Next

### 1.1.1 Transfer Pre-approval form

The "Transfer Pre-approval" form will prompt you to complete the resource request form to demonstrate your IPv4 requirement. The APNIC Registration Services team will then evaluate your request for pre-approval.

If your re-approval request is approved, APNIC Registration Services will inform you of the approved size of the pre-approval. You can also check your pre-approval details in MyAPNIC.

## Request Transfer Pre-approval

Your account already has a valid pre-approval:

Approval date: 2016-01-19

Expiry date: 2018-01-19

Prefixes available: /21

Only complete this form if your IPv4 requirements have changed.

[Next](#)

You will also be given the option to list your pre-approval in the “IPv4 Transfer Listing Service” web page.

APNIC provides a listing page to enable a source of IPv4 transfers to contact a pre-approved recipient before a transfer is initiated.

[www.apnic.net/pre-approval-listing](http://www.apnic.net/pre-approval-listing)

### 1.2 Pre-approval validity

Pre-approvals are valid for 24 months. If your IPv4 requirements change, you can lodge a subsequent new pre-approval request. If the new request is approved, it will override your existing request.

If the size of the IPv4 transfer you wish to receive is greater than your pre-approval, you will be prompted to complete the resource request form to provide additional justification to receive the transfer.
