1. Accredited Registrar Status –

Table 1 displays the current number and status of the ICANN accredited registrars. The registrars are grouped into three categories:

Operational registrars: Those who have authorized access into the Sponsor's registry system for processing domain name registrations.

Registrars in the Ramp-up Period: Those who have received a password to access the dotCoop operational test and evaluation (OT&E) environment. The OT&E environment is provided to allow registrars to develop and test their systems with the dotCoop LLC registry system.

Registrars in the Pre-Ramp-up Period: Those who have been sent information by dotCoop, but have not yet executed the Registry Confidentiality Agreement and/or have not yet submitted a completed Registrar Information Sheet.

2. Service Level Agreement Performance

Table 2 shows the performance of the Registry in the reporting month.

Table 2. Service Level Agreement Performance

Metric	Performance
Total outage	3:75:00
Unplanned outage	3:75:00
Check domain average	N/A
Add domain average	N/A

In May, the unplanned outage affected all registry systems except DNS. It was caused by an outage in incoming bandwidth. Unfortunately our secondary network connection had been slightly misconfigured during the major server migration of the previous month, and was unable to take over automatically. This has now been rectified.

3. gTLD Zone File Access Activity

Table 3 summarizes the zone file access activity for the current reporting month. As required by the ICANN/dotCoop Registry Agreements, the dotCoop Registry provides third parties bulk access to the zone files for the .coop TLD.

Table 3. gTLD Zone File Access Activity

Zone file access passwords previous month	11
New zone file access passwords	0
Total zone file access approvals at end of reporting month	11

4. Completed Software Releases

As required by the ICANN/dotCoop Registry Agreements, Table 4 shows significant releases that have occurred in the reporting month. The dotCoop Registry system is

continually being refined and extended to better meet the needs of dotCoop registrants.

In May the .coop registry released a new EPP server. The major enhancements were the introduction of connection timeouts, and new processing to match the new .coop server policy which allows registrars to modify registrant organisation name changes without registry intervention.

9. Monthly Growth Trends

9.1 – 9.3 Total Monthly Domain Name Transaction Trend by Category

There are three main categories of monthly transactions executed by registrars:

Write – This category includes the following transactions: add domain, modify domain, delete domain, renew domain, and transfer domain.

Query – This category includes the following transactions: query domain and query domain transfer status.

Check – This category includes the following transactions: check domain.

This table shows the number of domain name transactions for each of these categories.
