Dulles, VA 20166-6503**

## VeriSign Registry Monthly Report –February 2001

This report provides an overview of VeriSign Registry activity through the end of the reporting month. The information is primarily presented in table and chart format with text explanations as deemed necessary. To simplify charts, numbers have been rounded to the nearest significant digit shown.

Information is organized as follows:

|  |   |
|--|---|
| Table 1 – Accredited Registrar Status – February 28, 2001.....       | 3 |
| Table 2 – Service Level Agreement Performance – February 2001 .....  | 3 |
| Table 3 – gTLD 64-Bit Server Project Status –February 28, 2001 ..... | 4 |
| Table 4 – gTLD Zone File Access Activity – February 2001 .....       | 4 |
| Table 5 – Completed Shared Registration System Releases .....        | 5 |
| Figure 1 – Total Transactions by Month .....                         | 7 |
| Table 6 – Total Monthly Transactions by Category.....                | 7 |
| Figure 2 – Daily Transaction Range.....                              | 8 |
| Figure 3 – TLD Registrations Distribution –February 28, 2001 .....   | 8 |

## VeriSign Registry Monthly Report –February 2001

**Table 1** displays the current number and status of the ICANN accredited registrars. The registrars are grouped into three categories:

1. **Operational Registrars:** Those who have authorized access into the Shared Registration System (SRS) for processing domain name registrations. It should be noted that operational registrars are not listed on the InterNIC.net web site until they specifically request the Registry to do so. This means that a registrar may be operational from the point of view of the Registry but not listed on the InterNIC site, so it is possible that the number of operational registrars shown below may differ from the number included on the InterNIC site.
2. **Registrars In The Ramp-Up Period:** Those who have received a password to access the Registry operational test and evaluation (OT&E) environment. The OT&E environment is provided to allow registrars to develop and test their systems with the SRS.
3. **Registrars In The Pre-Ramp-Up Period:** Those who have been sent a welcome letter from the VeriSign Registry but have not yet executed the Registry Confidentiality Agreement and/or have not yet submitted a completed Registrar Information Sheet. In most cases registrars are sent welcome letters via overnight express mail on the same day accreditation notification is received from ICANN.

**Table 1 – Accredited Registrar Status – February 28, 2001**

| Status                           | # of Registrars |
|----------------------------------|-----------------|
| Operational Registrars           | 77              |
| Registrars In Ramp-Up Period     | 46              |
| Registrars In Pre-Ramp-Up Period | 29              |
| <b>Total</b>                     | <b>152</b>      |

**Table 2** compares Service Level Agreement (SLA) Requirements with Actual Performance for the reporting month. As required by Section 18 of the ICANN-NSI Registry Agreement, the VeriSign Registry has negotiated an SLA with all accredited registrars. The SLA is incorporated into the NSI-Registrar License and Agreement that is executed with all operational registrars. **Note:** *The SLA permits two 12-hour windows per year to perform major upgrades.*

**Table 2 – Service Level Agreement Performance – February 2001**

| Metric               | SLA Requirement | Actual Performance |
|----------------------|-----------------|--------------------|
| Total outage         | 8 hours         | 5 hours 23 minutes |
| Unplanned outage     | 4 hours         | 2 hours 39 minutes |
| Check domain average | 3 seconds       | .04 seconds        |
| Add domain average   | 5 seconds       | 1.51 seconds       |

## VeriSign Registry Monthly Report –February 2001

**Table 3** lists all current and planned 64-bit gTLD servers. The VeriSign Registry is responsible for operating and maintaining the Domain Name System (DNS) generic top-level domain (gTLD) name servers that support the .com, .net, and .org domains. To optimize DNS services provided to the Internet community and accommodate for the continued growth of the Internet, the VeriSign Registry re-architected the DNS infrastructure. This included replacing the current 32-bit name servers with more powerful 64-bit systems that will improve the availability, reliability, and performance of the DNS services. This also included placing the servers closer to the topological cores of the Internet where they are now more accessible to a greater number of hosts and users. In conjunction with this task, the gTLD server function is being separated from the root server function.

**Table 3 – gTLD 64-Bit Server Project Status –February 28, 2001**

| gTLD Server        | Under NSI Control? | 64-bit Implementation | Location              |
|--------------------|--------------------|-----------------------|-----------------------|
| a.root-servers.net | Yes                | Completed             | Herndon, VA USA       |
| a.gtld-servers.net | Yes                | Completed             | Herndon, VA USA       |
| b.gtld-servers.net | Yes                | Completed             | Los Angeles, CA USA   |
| c.gtld-servers.net | Yes                | Completed             | Dulles, VA USA        |
| d.gtld-servers.net | Yes                | Completed             | Mountain View, CA USA |
| e.gtld-servers.net | Yes                | Completed             | Mountain View, CA USA |
| f.gtld-servers.net | (future)           | 3/16/01               | Seattle, WA USA       |
| f.gtld-servers.net | Yes                | Completed             | Palo Alto, CA USA     |
| g.gtld-servers.net | (future)           | 4/13/01               | Amsterdam, NL         |
| g.gtld-servers.net | Yes                | Completed             | Herndon, VA           |
| i.gtld-servers.net | Yes                | Completed             | Stockholm, SE         |
| l.gtld-servers.net | Yes                | Completed             | Atlanta, GA USA       |
| k.gtld-servers.net | Yes                | Completed             | London, UK            |
| j.gtld-servers.net | Yes                | Completed             | Tokyo, JP             |
| m.gtld-servers.net | Yes                | Completed             | Hong Kong, CN         |

**Table 4** summarizes the zone file access activity for the current reporting month. As required by Section 19 of the ICANN-NSI Registry Agreement, the VeriSign Registry provides third parties bulk access to the zone files for the .com, .net, and .org TLDs.

**Table 4 – gTLD Zone File Access Activity – February 2001**

|   |     |
|---|-----|
| Zone file access passwords previous month –1/01               | 734 |
| New zone file access passwords                                | 45  |
| Total zone file access approvals end of reporting month –2/01 | 779 |

**Table 5** shows significant releases that have occurred since November 1999. The VeriSign Registry Shared Registration System (SRS) is continually being improved to better meet the needs of accredited registrars.

**VeriSign Registry Monthly Report –February 2001**

**Table 5 – Completed Shared Registration System Releases**

| <b>Release Name</b>     | <b>Features</b>   | <b>Target Date</b> | <b>Complete Date</b> |
|-------------------------|---|--------------------|----------------------|
| Auto Transfer ACK       | <ol style="list-style-type: none"> <li>1. Change of automated domain transfer response from “nack” (or reject) to “ack” (or accept) after five days of no response from the losing registrar.</li> <li>2. “Live” date fixed per NSI/DOC/ICANN agreements.</li> </ol>  | 10 Nov 99          | 10 Nov 99            |
| NACK Credit             | Credit registrars for domain transfers that were automatically NACKed and not credited prior to the change from automated NACK to ACK   | 12 Nov 99          | 12 Nov 99            |
| RRP “Listdomains” Patch | Remove “Listdomains” option from RRP name server “Status” command   | 20 Nov 99          | 20 Nov 99            |
| Whois Phase 1           | <ol style="list-style-type: none"> <li>1. Change language to include disclaimer – refer to InterNIC site</li> <li>2. Change pointer from registrar Whois to Registry Whois.</li> </ol>  | 01 Dec 99          | 01 Dec 99            |
| Richmond                | <ol style="list-style-type: none"> <li>1. Changes to RRP (Add, Renew, and Transfer)</li> <li>2. Annual registration fee price change</li> </ol>   | 15 Jan 00          | 15 Jan 00            |
| Jamestown               | <ol style="list-style-type: none"> <li>1. Restructured zone, Whois, and data file extract and publish process</li> <li>2. Database efficiency patches</li> <li>3. Production log file analysis</li> </ol>   | 29 Apr 00          | 29 Apr 00            |
| Leesburg                | <ol style="list-style-type: none"> <li>1. Daily Transfer Reports</li> <li>2. Disallow transfers during 60 days after new registrations</li> <li>3. ADD and MOD commands to prevent 13 name servers</li> </ol>   | 29 Apr 00          | 29 Apr 00            |
| Herndon                 | <ol style="list-style-type: none"> <li>1. Oracle 7.3 to 8.1 migration</li> <li>2. IBM DB server Migration               <ol style="list-style-type: none"> <li>a. Improved database server scalability and availability.</li> <li>b. DB HA.</li> <li>c. DB File system Layouts.</li> <li>d. Training.</li> <li>e. Migration with parallel operations</li> </ol> </li> </ol> | 10 Jun 00          | 10 Jun 00            |

## VeriSign Registry Monthly Report –February 2001

| Release Name | Features   | Target Date  | Complete Date |
|--------------|--|--------------|---------------|
| Bull Run     | <ol style="list-style-type: none"> <li>1. SIGNIFICANT improvements in system Reliability, Availability, and Serviceability to encompass all four product groups – Web Tools, Data Services, Directory Services and SRS.</li> <li>2. User requested functionalities to include                             <ol style="list-style-type: none"> <li>a. Seven new features to the Registrar Tool</li> <li>b. Modify subject line on e-mails to include domain</li> </ol> </li> </ol> | 23 Sep 00    | 23 Sep 00     |
| Multilingual | Start of multilingual test bed registrar certification process   | 17 Oct 00    | 17 Oct 00     |
| Multilingual | Start of the “registration only” phase of the multilingual test bed.   | 10 Nov 00    | 10 Nov 00     |
| Multilingual | Start of resolution stage, phase 1.  | Dec 00       | 15 Jan 01     |
| Fairfax 1    | Improvements in data integrity and serviceability  | Mid February | 24 Feb 01     |
| Multilingual | Addition of code points to support European languages  | 26 Feb 01    | 26 Feb 01     |
| Multilingual | Start of resolution phase 2  | Mid March    |               |
| Multilingual | Addition of code points to support Southeast Asian and Indian languages  | Late March   |               |
| Fairfax 2    | Availability of component applications   | Late March   |               |
| Multilingual | Addition of code points to support Middle Eastern languages  | Apr 01       |               |
| Nile         | User feature improvements  | Jun 01       |               |
| Escrow       | Data escrow enhancements   | Jun 01       |               |

**Figure 1** displays the monthly growth trend in total Registry transactions. Transactions are executed by registrars via the Registry Registrar Protocol (RRP) with the Shared Registration System (SRS) and are divided into three categories in the **Table 6**.

1. **Query** – This category includes the following transactions: query a domain and query a server.
2. **Write** – This category includes the following transactions: adding a new domain, deleting a domain, modifying a domain name record, renewing a domain, transferring a domain, adding a server, deleting a server and modifying a server record.
3. **Check** – This category includes the following transactions: check a domain and check a server.

**Figure 1 – Total Transactions by Month**

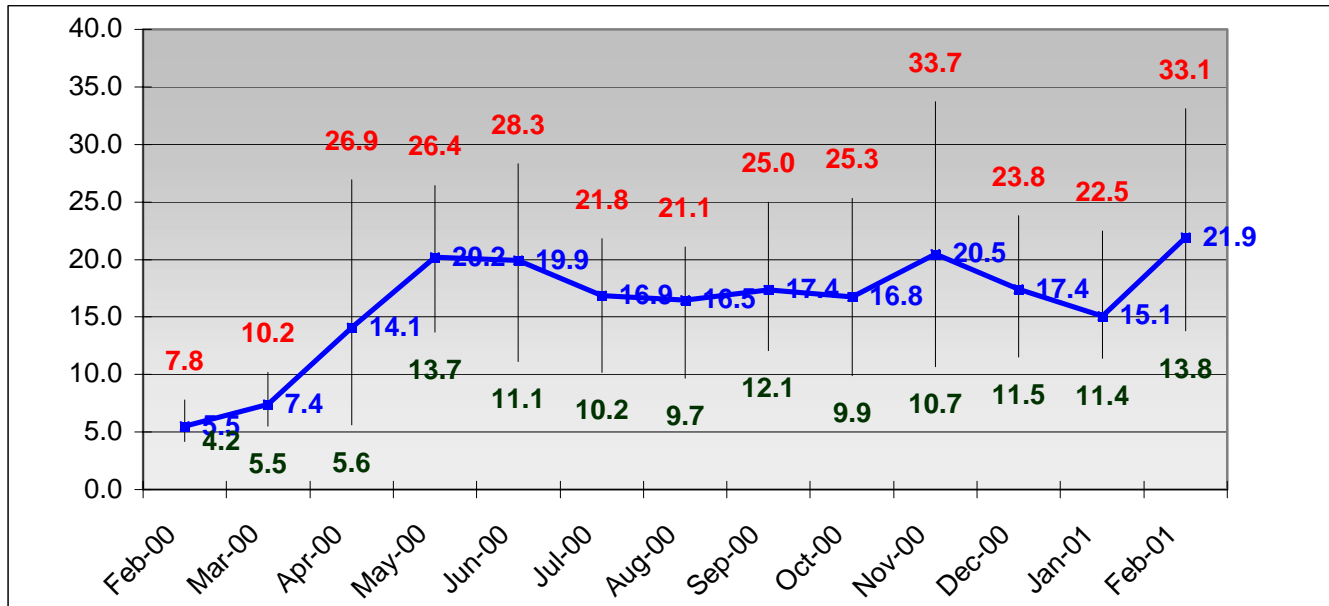

**Table 6 – Total Monthly Transactions by Category**

|        | Query | %    | Write | %    | Check | %     |
|--------|-------|------|-------|------|-------|-------|
| Oct-99 | 0.4   | 1.3% | 1.6   | 5.1% | 29.2  | 93.6% |
| Nov-99 | 3.3   | 7.1% | 4.5   | 9.7% | 38.6  | 83.2% |
| Dec-99 | 4.4   | 5.0% | 5.1   | 5.8% | 78.7  | 89.2% |
| Jan-00 | 2.6   | 2.2% | 3.9   | 3.2% | 113.7 | 94.6% |
| Feb-00 | 1.6   | 1.0% | 6.6   | 4.1% | 151.6 | 94.9% |
| Mar-00 | 4.3   | 1.9% | 4.7   | 2.0% | 221.4 | 96.1% |
| Apr-00 | 5.4   | 1.3% | 4.1   | 1.0% | 413.4 | 97.8% |
| May-00 | 6.3   | 1.0% | 4.2   | 0.7% | 616.9 | 98.3% |
| Jun-00 | 6.3   | 1.1% | 4.1   | 0.7% | 587.2 | 98.3% |
| Jul-00 | 9.9   | 1.9% | 3.5   | 0.7% | 509.4 | 97.4% |
| Aug-00 | 12.5  | 2.5% | 4.3   | 0.8% | 493.4 | 96.7% |
| Sep-00 | 13.6  | 2.6% | 5.4   | 1.0% | 502.0 | 96.4% |
| Oct-00 | 21.4  | 4.1% | 5.4   | 1.0% | 492.5 | 94.8% |
| Nov-00 | 17.0  | 2.8% | 4.9   | 0.8% | 591.9 | 96.4% |
| Dec-00 | 17.0  | 3.1% | 4.6   | 0.9% | 518.6 | 96.0% |
| Jan-01 | 19.3  | 4.1% | 4.7   | 1.0% | 443.1 | 94.9% |
| Feb-01 | 22    | 3.7% | 5.1   | 0.9% | 565.7 | 95.4% |

## VeriSign Registry Monthly Report –February 2001

**Figure 2** - Trend in the number of total daily transactions. The range of transaction volume is shown for each month along with the average daily transaction volume.

**Figure 2 – Daily Transaction Range**

**Figure 3** shows the percent of second-level domain names registered in each of the .com, .net and .org gTLDs as of the end of the current reporting month.

**Figure 3 – TLD Registrations Distribution –February 28, 2001**
