**Date:** 3 September 2021

**Subject:** For information - liaison response on strategy to bind IEEE 802.1Qcx to IETF Alarm Management model supporting BBF requirements

Dear colleagues,

Thank you for your feedback on our liaison statement regarding the strategy chosen by the BBF to bind the IEEE 802.1Qcx CFM YANG model to the IETF RFC 8632 Alarm Management YANG model to support BBF access node requirements.

We are fully aligned with the assessment done by IEEE and specifically the different ways of leveraging parts of the IEEE standard as shown in the diagrams provided in your liaison response.

We would like to inform you that we will continue to proceed with the understanding that the BBF model results in a non-compliant IEEE 802.1Q Device, extending the ieee802-dot1q-cfm YANG module with a BBF YANG module that defines alarms per defect.

Sincerely,

Lincoln Lavoie,  
Broadband Forum Technical Committee Chair
