ITU-T SG15 notes that draft-ietf-mpls-tp -framework-12 has been approved and is in the RFC editor's queue. However, Q12/15 did not have an opportunity to review the final version of this draft before approval. Since draft revised Recommendation G.8110.1 makes a normative reference to this draft it is necessary under the requirements of Recommendation A.5 for Q12 to reach consensus that the final text is suitable for inclusion (by normative reference) into draft revised G.8110.1. During a review of this draft a number of issues were identified which prevented us from reaching consensus to make a normative reference to this draft.

We request that you address these comments provided in the attached document and provide us with a final version of the text so that we can reach consensus to include this as a normative reference in draft revised Recommendation G.8110.1. WP3 has tentatively planned to hold an interim plenary meeting to consent G.8110.1 in November 2010.

Attach: draft-ietf-mpls-tp-framework-12-a12v4.doc.
