Thank you for your liaison statement requesting a review L2VPN OAM Requirements and Framework - *draft-ietf-l2vpn-oam-req-frmk*.

We apologize for replying later that the deadline.

Q10/15 has reviewed the draft and verified that the indicated architecture depicted in Figure 4 is consistent with the architecture defined in Y.1731/IEEE802.1ag-2007 at a high level. However we noted that some terminologies such as MEP and MIP differ from the ones defined in Y.1731/IEEE802.1ag-2007.

Therefore we have no specific comments on this document apart from the terminology consistency.
