Q1/15 notes the announcement of a new IETF Homenet WG via iLS TD 558 (WP1).

Q1/15 welcomes this new WG and is available via LS to review draft standards for home network architecture.

Q1/15 notes the publication of several ITU-T Standards on Home Network Architecture:

G.9970: *Generic home network transport architecture*

G.9971: *Requirements of transport functions in IP home networks*

In addition, a new standard G.9973: *Protocol for identifying home network topology* has been approved at the September 2011 SG 15 meeting and enters AAP approval process. It has been provided to IETF by separate liaison statement.

Q1/15 looks forward to cooperation with IETF Homenet WG.
