ITU-T thanks IETF for the opportunity to review RFC 4258 and RFC 4652 to determine if the RFCs contain ITU-T's current requirements for ASON routing. Attached to this liaison is the result of the review, which looks at the requirements in the current in-force versions of G.8080, G.7715 and G.7715.1 and determines if RFC 4258 and RFC 4652 documents ITU-T's existing as well as new requirements.

We would appreciate collaborating with IETF in the review of the attached table as well as resolving the gaps between the ITU-T documents and the RFCs.

We look forward to work with the IETF to resolve this gap. Please advise on the best method of working together to resolve this issue.
