Re: draft-yokota-mipshop-pfmipv6-03

Dear Thomas,

TSG-X understands that mipshop recently adopted draft-yokota-mipshop-pfmipv6-03 as a working group draft.

In our specification, X.P0057-0 v1.0, *E-UTRAN - eHRPD Connectivity and Interworking: Core Network Aspects*, we specify use of the mobility header-based Handover Initiate (HI) and Handover Acknowledge (HACK) messages for inter-HSGW handover. Deployment concerns prevent our use of ICMPv6 for carrying the HI/HACK messages.

3GPP2 TSG-X intends to publish X.P0057-0 v1.0 in early 2009. We therefore would appreciate assignment of MH type values for the HI and HACK messages, and expeditious completion of the draft.

Regards,

Avi Lior
3GPP2 Liaison to the IETF
