ITU-T SG 13 Question 12 wishes to thank the IETF CCAMP working group for the informative liaison on RFC 3936 "Procedures for Modifying the Resource reSerVation Protocol (RSVP)".

Question 12/13 is the continuation of Q.5/17 (formerly in SG 17) on Frame Relay. Recently the ITU-T approved Recommendation X.84 Frame Relay Services over MPLS. We are currently working on Draft new ITU-T Recommendation X.84 Amendment 1, Control Plane and PVC Status Monitoring.

We wish to encourage further communication between our two groups. We shall keep you informed on the progress of our work and request you do the same in return.
