Subject: T1S1 requirements for a solution to DTMF Digit Collection.

Dear Allison:

Joe Zearth reported on the IETF 58 IETF SIPPING Meeting during the November T1S1 meeting.

We were pleased to hear that the KPML draft, which has been made available to our membership, has progressed significantly in recent months. We were especially pleased to also hear that you would be prepared to expedite completion of the KPML draft to make it available in a timely fashion for the use of our membership.

In that regard we understand that you requested input as to when a mature KPML RFC would be required to address our needs. This question was put to our membership and we had a consensus that its availability before the end of first quarter of 2004 would be most helpful. Availability subsequent to that date may require the consideration of alternative solutions, e.g. the solution proposed in Committee T1 Technical Report T1.TR.82-2003 "SIP Network Operators Implementers Guide for Pre-Paid Calling Card, with DTMF Detection at the PSTN-IP Gateway".

We appreciate your offer of cooperation in this matter and look forward to a course of continued cooperation.

Sincerely,

Reply to:
