

Liaison Statement to IETF

Document Title	WBA Liaison Statement on RADIUS/Diameter interworking	Page 1 of 1
-----------------------	---	-------------

Meeting Date	21 st August 2014	Meeting Time	GMT 16:00-17:00
WG / Project	Roaming Enhancements Work Group		
Subject	RADIUS/Diameter interworking		
Project chaired by	Michael Sym (BSG Wireless) and Erinn Hall (AT&T)		
Sent to	IETF	Copied to	N/A
Action ID Prefix	N/A		

To The Author(s) of RFC 4005/7155

The WBA (Wireless Broadband Alliance) is currently working with the GSMA to define best practices for RADIUS/Diameter interactions. In reviewing RFC 4005 and its update, RFC 7155, we noticed that "all of the material regarding RADIUS/Diameter protocol interactions has been removed". This change removed an entire chapter, and its related information. We were hoping to gain some insight as to why IETF chose this route. Would you be able to share any information on why these details were removed? Any insight would be much appreciated.
