Subject: Review and Comment on TR-350 Issue 2 - Ethernet Services using BGP MPLS Based Ethernet VPNs (EVPN) – ELINE and ETREE

Dear Colleagues,

In November 2015, the BBF published TR-350 - Ethernet Services using BGP MPLS Based Ethernet VPNs (EVPN) which covered architecture and equipment requirements for implementation of ELAN service types using the EVPN technology.

Also in November 2015, the BBF started working the second phase of the TR-350 work adding ELINE and ETREE service types to this important specification. The work has progress through 2016 and early 2017 and has entered the beginning of the Broadband Forum approval process. During this phase we would greatly appreciate your review and comments.

To consider your comments during our 3Q2017 meeting we would need to receive them by 6 September 2017. Comments received after 6 September will be considered during our 4Q2017 meeting in December 2017.

We look forward to working with you and we would like to thank you for your timely consideration and response.

Sincerely,

Michael Fargano,
Broadband Forum Technical Committee Chair
