Cc	Kevin Vachon, COO MEF (kevin@mef.net) Robin Mersh, CEO BBF (rmersh@broadband-forum.org) April Nowicki, BBF Secretariat (anowicki@broadband-forum.org)
From	MEF Forum

Further to our previous liaisons, we would like to inform you that a new MEF Approved Draft is available for IP Service Attributes MEF Specification. This document is a revision to MEF 61, that adds support for wholesale IP services between Service Providers and Operators, that terminate at UNIs and ENNIs.

We would welcome any comments you have regarding this draft. It is intended that this document will be submitted for final approval in MEF in January 2019, and so we would request that you send any feedback by the end of November 2018.

MEF's liaison partners may access all MEF approved drafts as follows:

<https://mef.net/liaison-login>

Username: mef

Password: M3F3030

The forthcoming MEF meetings are:

- 31 October - 2 November 2018, Los Angeles
- 28 - 31 January, Hong Kong
