Abstract: This liaison advises about the ongoing series of cross-SDO virtual meetings to coordinate work on information models.

ITU-T Q14/15 appreciates the coordination and support of SDOs in the development of interoperable transport system and equipment management, including time synchronization, carrier-grade Ethernet and MPLS-TP. ITU-T Q14/15 will continue to host coordination virtual meetings on the following dates. Modelling experts of the receiving SDOs of this liaison statements are invited to join.

ITU-T Q14/15 would like to inform that the G.8151 Amendment 1 (Management aspects of the MPLS-TP network element) and G.8152 (Protocol-neutral management information model for the MPLS-TP network element) will be proposed for consent at the November 2023 meeting of SG15.
