LETTER TO MEMBERS

In 2021, the OASIS Open community continued responding to challenges in yet another pandemic year, as businesses were presented with supply chain and employee availability issues. Through it all, OASIS members and staff remained steadfastly focused, making notable progress developing a new future to serve the needs of the marketplace.

The rich technical diversity and expertise of OASIS members is on display this year in the variety of Specification and Standard development milestones achieved. This diversity is expanding both technically and across business lines.

Responding to changes in the marketplace, OASIS has accelerated its growth toward open source techniques and technologies: Technical Committees are using repo-based tools more frequently in their specification work; OSLC, with three new OS Standards, was the first Open Project to formalize its work as an OASIS Standard; a new service plan for Managed Open Projects was developed and implemented in partnership with Ethereum Enterprise Alliance to combine the collaboration process facilitation of OASIS and the brand strength of major market influencers; and the board updated our Member Agreement to allow Open Project Sponsors to enjoy full member rights in the Consortium. The entire OASIS community will benefit from these improvements in the years to come.

Five new board members were elected into service through the Annual Election and a Special Election. Jim Cabral rejoined the board after a brief hiatus, and newly elected members Nima Dokoochaki, Ross Gardler, Anish Karmarkar, and Altaz Valani bring fresh new perspectives and insights.

2021 also brought new staff support to OASIS members' work. Claudia Rauch joined the Open Project support team to help manage our growing Open Projects Program. Mary Beth Minto was promoted to Content Manager to better promote the work of our members, committees, and projects. You'll see these promotional efforts expanding across all platforms and channels. Just after the turn of the year, Irene Heller joined us as Community and Member Engagement Coordinator to round out the OASIS team.

Going forward, I hope 2022 brings opportunities and success to all. I encourage all members to regularly be in contact with OASIS staff so we may help you achieve your goals.

Lastly, thank you to the thousands of members who have worked tirelessly in their committees and projects toward their common goals. This report highlights our members' combined intellect, commitment, and expertise. Your efforts continue to build a brighter future for OASIS and the world.

Scott McGrath

Chief Operating Officer, OASIS Open

BOARD OF DIRECTORS

The OASIS Board of Directors is comprised of executive-level officers, dedicated to advancing open standards and experienced in managing organizational growth and defining policies. Directors exercise a major impact on the strategic direction of the consortium and guide OASIS in achieving its mission.

Members of the OASIS Board of Directors are nominated in an open election process by the Sponsors and Contributors of the Consortium. Each director serves a two-year term.

OASIS OPEN STANDARDS

APPROVED IN 2021

LegalRuleML Core Specification v1.0

LegalRuleML Technical Committee

Enabling legal arguments to be created, evaluated, and compared using rule representation tools.

Open Document Format for Office Applications (OpenDocument) v1.3

Open Document Format for Office Applications (OpenDocument) Technical Committee

Developing an XML-based file format specification for office documents and applications.

OSLC Change Management v3.0 OSLC Requirements Management v2.1 OSLC Query v3.0 OSLC Quality Management v2.1 OSLC Core v3.0

*Open Services for Lifecycle Collaboration (OSLC)
Open Project*

An open community building practical specifications for integrating lifecycle management of software.

Service Metadata Publishing (SMP) v2.0 and Exchange Header Envelope (XHE) v1.0

*Business Document Exchange (BDXR)
Technical Committee*

Defining a lightweight and federated messaging infrastructure to support public e-procurement and e-invoicing.

STIX v2.1 and TAXII v2.1

*Cyber Threat Intelligence (CTI)
Technical Committee*

Supporting automated information sharing for cybersecurity situational awareness, real-time network defense, and sophisticated threat analysis.

Universal Business Language v2.3

*Universal Business Language (UBL)
Technical Committee*

Defining a common XML library of business documents (purchase orders, invoices, etc.) to support e-commerce.

COMMITTEE SPECIFICATIONS APPROVED IN 2021

OASIS OPEN PROJECTS

OASIS Open Projects provides collaborative communities with foundation-level support, IP and license management, stakeholder governance, an open process, and more. With Open Projects, communities have the power to develop what they choose—code, APIs, standards, reference implementations—under open source licenses with an option for their work to be referenced in global policy and procurement.

Baseline Protocol: An EEA Community Project **- An OASIS Managed Open Project -**

The Standard for universal verified state synchronization & multiparty coordination using zero knowledge. Baseline is a part of EEA Community Projects, an OASIS Managed Open Project.

OPEN CYBERSECURITY ALLIANCE

Open Cybersecurity Alliance (OCA)

Supporting an open source ecosystem where cybersecurity products can interoperate without one-off integrations by using commonly developed code, tooling, and standards.

OriginBX

Defining open source standards that let digital tax and trade attribute attestations be transmitted with legacy and blockchain platforms, facilitating cross-border exchange of product data using a globally universal, consistent message set.

RECITE:

REasoning for Conversation and Information Technology Exchange

An open community developing a standard for modeling dialogs in conversational agents.

OSLC:

Open Services for Lifecycle Collaboration

An open community building practical specifications for integrating software.

OPEN PROJECTS ADVISORY COUNCIL

The OASIS Open Projects Advisory Council is working to create a more transparent and collaborative future for industry, standards consortia, and open source. Advisory Council members are industry experts with unique and diverse perspectives, who influence the direction of the Open Projects program by providing strategic insight on the needs of open source projects and the industries they support.

MEMBER SECTIONS

Emergency Interoperability

The mission of the OASIS Emergency Interoperability Member Section is to accelerate the development, adoption, application, and implementation of emergency interoperability and communications standards and related work. The EI Member Section endeavors to represent and serve the needs of all constituents in the marketplace, ranging from practitioners to technology providers, from national to international and multinational oversight agencies.

2021 Common Alerting Protocol (CAP) Workshop
13-14 October 2021, Geneva, Switzerland

OASIS Open co-sponsored the global Common Alerting Protocol (CAP) Implementation Workshop together with the International Telecommunication Union (ITU), the World Meteorological Organization (WMO), the International Association of Emergency Managers (IAEM), and the Red Cross Federation. Due to the pandemic, the Workshop was held online, hosted by ITU in Geneva, with more than 750 registered participants. Guy Martin, Executive Director of OASIS Open, and Elysa Jones, Chair of the OASIS Emergency Management Technical Committee, addressed the meeting regarding advances in OASIS Emergency Management standards.

Identity and Trusted Infrastructure (IDtrust)

The OASIS Identity and Trusted Infrastructure (IDtrust) Member Section promotes greater understanding and adoption of standards-based identity and trusted infrastructure technologies, policies, and practices. The group provides a neutral setting where government agencies, companies, research institutes, and individuals work together to advance the use of trusted infrastructures, including Public Key Infrastructure (PKI).

LegalXML

LegalXML focuses the recognized standards development processes of OASIS on the grand challenges of interoperability in the legal industry. LegalXML produces standards for electronic court filing, court documents, legal citations, transcripts, criminal justice intelligence systems, and others. OASIS members participating in LegalXML include lawyers, developers, application vendors, government agencies and members of academia.

TECHNICAL ADVISORY GROUPS TO ISO

U.S. Technical Advisory Group Under ANSI and OASIS to ISO/PC 317

Collaborating to help define the new international standard for "Consumer Protection: Privacy by design for consumer goods and services."

U.S. Technical Advisory Group Under ANSI and OASIS to ISO/TC 324

Collaborating to help define the new international standard for the "Sharing Economy"

OASIS OPEN EUROPE FOUNDATION

The OASIS Open Europe Foundation (OOEF) was set up as a European sovereign affiliate organization to OASIS Open. The OOEF provides a regional focus for members and other stakeholders of OASIS Open in Europe; engages in European specific activities to promote, progress, and adopt OASIS Open technologies; and participates in collaborative projects supported using funding instruments of the European Union (EU) and EU Member States.

In 2021, the STRATEGY.EU project, which is funded by the EU, invited OASIS and the OOEF to cooperate regarding pre-standards and testing of cross-border emergency management standards available for response to natural disasters and hazards and emergencies, such as chemical spills or radio-active leaks. The OOEF was invited to take a place on the Project Advisory Board and, through OASIS, the main participants in the Emergency Management Technical Committee will assist in testing the OASIS EDXL suite of standards.

European Commission's Multi-Stakeholder Platform on ICT Standardization (MSP)

Throughout 2021, OASIS Open participated as a core member of the European Commission's Multi-Stakeholder Platform on ICT Standardization (known as the MSP), with presentations on the OASIS Open Projects program and the OASIS Open Europe Foundation.

The MSP is composed of representatives of national authorities from EU Member States & EFTA countries, by the European and international ICT standardization bodies, and by stakeholder organizations that represent industry, small and medium-sized enterprises and consumers.

FOUNDATION-AS-A-SERVICE

The OASIS Open Development Foundation, LLC serves as a host to the Foundation-as-a-Service program. OASIS Foundation-as-a-Service streamlines the process of forming and running a foundation for your collaborative development community. It's the smart solution for groups that want to advance open source code, standards, or related activities. Foundations operate independently while enjoying the benefits of the OASIS nonprofit corporate structure.

www.openmobilityfoundation.org

Celebrating its second year in 2021, the Open Mobility Foundation (OMF) is an open source foundation that creates a governance structure around open source mobility tools, beginning with a focus on the Mobility Data Specification (MDS).

The Open Mobility Foundation is governed by municipalities across the country that are united in finding solutions to shared transportation challenges. Joined by experts, advocates, and other stakeholders, the Foundation's leaders work together – incorporating viewpoints and expertise from key groups and communities – to develop open source urban mobility tools.

In 2021, the OMF community continued to grow:

- Expanded to new corners of the world and welcomed more than a dozen new members from the public and private sectors.
- Worked to share best practices, launched member networks, hosted a series of virtual events about key issues in mobility, and created dozens of guides and resources.
- Built digital tools that help cities better manage the movement of people and goods, and released both a new major and minor version of MDS, the data specification used by more than 130 cities and companies around the world.

The Samvera Community is a global community of technologists who create and maintain a suite of open source repository software. Libraries and other cultural heritage institutions around the world rely on Samvera Community supported software to organize, preserve, and provide access to their digital content. Samvera is based on the premise that no single system can provide the full range of repository-based solutions for a given institution's needs, and that no single institution can resource the development of a full range of solutions on its own. Working together, the Samvera Community creates sustainable solutions using a common infrastructure within which there is the flexibility to tailor solutions to local demands and workflows.

Samvera is a community of practice where software developers and library technologists can support and learn from one another in a welcoming, vibrant, and supportive community. The community has active participation from metadata specialists, repository managers, user experience professionals, and others who contribute their expertise to ensure the software stays relevant and responsive to changing needs.

Samvera has over one hundred implementations around the world and 34 committed Partners who collectively advance the project and the community for the benefit of all participants. Partners pledge to contribute financially to Samvera and to participate in community decision making.

<https://samvera.org/>

Samvera became an OASIS Foundation-as-a-Service partner in June 2021.

2021 DISTINGUISHED CONTRIBUTORS

This lifetime achievement award is given to members who provide outstanding service and contributions to the OASIS community and our mission. We gratefully acknowledge these outstanding individuals for their impact on the global information society. We're pleased to announce the 2021 Distinguished Contributors.

MARTIN CHAPMAN, PHD

Martin Chapman, Ph.D., served on the OASIS Board of Directors from 2013-2021, and his roles included Vice Chair and Board Process Committee Chair. Martin promoted open standards and interoperability across Europe, focusing on standardization activities in the areas of Web Services, SOA, Business Process, and Cloud, and became involved in many activities in organizations such as OASIS, W3C, OMG, WS-I, ISO, and ITU-T. Martin served as the OASIS Technical Advisory Board (TAB) Chair and member; the CAMP Technical Committee Chair; the Program Advisor for the OASIS Symposium series; the OASIS representative on the EU Stakeholder Cybersecurity Certification Group (SCCG); and Chair of the OASIS Open Europe Foundation.

FREDERICK HIRSCH

Frederick Hirsch served on the OASIS Board of Directors for 18 years, from 2003-2021, and his roles included Board Chair, Treasurer and Chair of the Board Finance and Audit Committee, Chair of the OASIS Board Governance and IPR advisory committee, Vice-Chair, Board Secretary, and Technical Advisory Board Liaison. Frederick is an independent consultant focused on establishing trust in systems based on the trustworthiness characteristics of security, safety, reliability, resilience and privacy. Frederick was a member of the Privacy By Design Documentation for Software Engineers (PbD-SE) Technical Committee and previously served as an editor in the SAML, WSS and DSS Technical Committees.

DUNCAN SPARRELL

Duncan Sparrell of sFractal Consulting serves as Chair of the OASIS Open Command and Control (OpenC2) Technical Committee and is a deeply engaged member of the Cyber Threat Intelligence (CTI) TC, the Collaborative Automated Course of Action Operations (CACAO) TC, and the Common Security Advisory Framework (CSAF) TC. Duncan is actively involved in the Open Cybersecurity Alliance (OCA), an OASIS Open Project, as a member of the Project Governing Board and the Technical Steering Committee. In addition, Duncan volunteers as the official OASIS liaison to ITU-T and is Editor of the ITU recommendation X.1144rev, which is XACML 3.0. He also served as Program Advisor to the OASIS Borderless Cyber Conference series. A seasoned network security evangelist with 40+ years of expertise in conceiving, developing and delivering state-of-the art software platforms, Duncan has published numerous articles and holds 7 patents.

2021 OPEN CUP AWARDS

The Open Cup Awards, recognizing major accomplishments in our community, are presented annually by the OASIS Technical Advisory Board. Each year, the Cup is awarded to one Outstanding Approved Standard and one Outstanding New Initiative.

Outstanding Approved Standard

STIX™ v2.1 and TAXII™ v2.1

Category Finalists:

- OSLC (Core v3.0, Change Mgmt v3.0, Requirements Mgmt v2.1, & Query v3.0)
- LegalRuleML Core Specification v1.0
- BDXR (Service Metadata Publishing (SMP) v2.0 & Exchange Header Envelope (XHE) v1.0)

Outstanding New Initiative

OriginBX Open Project

Category Finalist:

- Electronic Secure Authentication (ESAT) Technical Committee
